10 YEARS MONDRAKER RE-START

It all started 10 years ago with a blurry picture of the Petrol on the back cover of the magazine "Bike a Fondo" saying: "Soon you'll see it more clearly". That's the moment a new brand was born and the dream of a small group of people came true.

Time passed by quickly, and since the introduction of this first Petrol, going from the Kaiser to the Summum, many things have changed in terms of development and product concept. It has been 10 years of work, passion, and innovation that culminates today with the presentation of the new Mondraker Image.

In the catalogue you are holding in your hands right now, you can sense the potential of Mondraker 2011 with the Stealth Technology and the Zero Suspension system covering the heart of the range, starting from the new Factor 120 mm to the much sought after Summum 200mm.

Relax and enjoy.

Tout a commencé il y a maintenant 10 ans avec la quatrième page de couverture du magazine "Bike a Fondo" sur laquelle apparaissait une photo floue du cadre Petrol et une phrase qui disait : "Bientôt, tu auras les idées claires...". A ce moment là est née une marque, et lors de cette première apparition dans la presse le rêve d'une poignée de personne devenait réalité.

Le temps s'est très vite écoulé et depuis ce premier Petrol, du Kaiser jusqu'au Summum actuel, beaucoup de choses ont changé sur le point du développement et de la conception des produits. Ce sont 10 années de travail, de passion et d'innovation qui culminent aujourd'hui avec la présentation de la nouvelle image de Mondraker.

Dans le catalogue que tu tiens entre les mains tu peux percevoir tout le potentiel de Mondraker pour 2011, où la technologie Stealth et le système de suspension Zero couvrent tout le cœur de la gamme, en commençant par le nouveau Factor en 120mm de débattement et jusqu'au tant convoité Summum de 200mm.

Détends-toi et profite-en.

Alles begann vor 10 Jahren mit einem etwas unscharfen Photo auf der Rückseite des Magazins "Bike a Fondo" und folgendem Text: Bald wirst Du klarer sehen! Genau in diesem Augenblick war eine neue Mountain-Bike-Marke geboren und der Traum einiger Leute wurde Wirklichkeit.

Die Zeit verging wie im Flug und seit der Markteinführung des "Petrol", gefolgt vom "Kaiser" bis hin zum aktuellen "Summum" hat sich sehr viel getan in Sachen Neuentwicklung und Produktkonzept. Und nun, nach 10 Jahren voller Arbeit, Leidenschaft und Innovation, stellen wir als weiteren Höhepunkt das neue Logo unserer Marke vor.

Den nun vorliegenden Katalog in Händen, erkennt man die ganze Leistungsfähigkeit der Mondraker-Kollektion für das kommende Jahr 2011. Insbesondere die Rahmenteknik "Stealth" und das Federungssystem "Zero" stellen das Herzstück unserer Produktpalette dar, beginnend mit dem neuen 120mm-"Factor" und mit dem 200mm-"Summum" endend.

Entspanne Dich und genieße es!

In its first year of life the Summum has already obtained various praises. The English magazine "Dirt" for instance, proclaimed the Summum to be the best DH bike of the year. This year's Summum has gained geometric improvements and has spectacular specs, all of this to offer the lightest and most functional DH Bike as possible. An example is its front suspension Marzocchi 883 RC EVO Ti, used for the basic model of the Summum range.

Avec seulement une année d'existence le Summum a déjà reçu de nombreux éloges, parmi lesquels celui d'être élu vélo de descente de l'année par le magazine anglais "Dirt". Cette année il reçoit quelques améliorations au niveau de la géométrie et un montage spectaculaire pour faire de lui le vélo de descente le plus léger et le plus efficace possible, pour preuve le montage sur l'entrée de gamme Summum de la Marzocchi 888 RC3 EVO Ti.

Im ersten Jahr nach der Einführung in das Sortiment Mondrakers hat das Model Summum schon verschiedene Lobpreisungen bekommen. Zum Beispiel hat das englische Magazin "Dirt" das Model Summum zum besten DH bike des Jahres gewählt. Neu dieses Jahr ist die verbesserte Geometry und die bessere Komponentenauswahl. Das alles um das leichteste und funktionellste DH bike auf dem Markt anbieten zu können. Ein Beispiel ist die Federgabel Marzocchi 883 RC EVO Ti, die bereits beim Einstieger model des Summum verbaut ist.

ADJUSTABLE GEOMETRY KIT

The purpose of this kit is to adapt the geometry to your preferences according to your riding style or the type of circuit you use. This way you can make adjustments from an extreme geometry that riders would use during the world cup DH, to a geometry more adequate for Freeride. The kit contains 3 headset reducers made of CNC for 0°, +/- 1° and +/- 2° and 4 different drop-outs to adjust the length of the chainstay into 435 mm, 400mm, 445 mm or 450 mm together with adjustable brake adaptors in accordance to the different lengths of the chainstay.

- > Mondraker Stealth Side Alloy Structure frame.
 - > Mondraker Zero Suspension System, 205mm
 - > Marzocchi 888 RC3 EVO Ti fork, 200mm
 - > Fox DHX RC2 rear shock
 - > Formula RX 203mm brakes
 - > Dt F600 Rims
- > Adjustable Geometry Kit as optional

DOWNHILL

- > Mondraker Monocoque Signature 6061T6 frame, 215mm
- > Rock Shox Boxxer Race fork, 200mm
- > Fox Van R rear shock
- > Formula RX 203mm brakes
- > Onoff Bula Wheelset
- > Race Face Respond components

The Kaiser will be kept in Mondraker's portfolio of models for 2011 for those who pretend to enjoy DH for a very reasonable price. The specs and characteristics of this model are of a very high level which makes the Kaiser both competitive and reliable. If you are not the first one to cross the finish, then don't blame the Kaiser but find another excuse.

Le modèle Kaiser que l'on ne présente plus est destiné à ceux qui veulent pratiquer la descente sans réaliser une grosse dépense. Idéal pour les amateurs de cette discipline, le Kaiser offre assurément un équipement de haut niveau. Si avec lui tu n'arrives pas le premier tout en bas cherche une autre excuse que ton vélo...

Das Kaiser wird auch dieses Jahr in der Produktlinie belassen für diejenigen, die Downhill zu einem günstigen Preis betreiben möchten. Die Spezifikationen und Eigenschaften dieses Modells sind hochwertig und damit ist das Model Kaiser sehr zuverlässig und eine absolute Garantie um deine DH Fahrten optimal zu genießen.

This is a new category we introduce in our range. It's focused on the most aggressive form of Enduro and is represented by our models Zenith. Bikes with 170 mm travel, air suspension, adjustable geometry kit... Conclusion: Like its name indicates, a bike to touch the sky.

Nouvelle catégorie dans la famille Mondraker, le côté le plus agressif de l'Enduro est représenté par les modèles Zenith. Des vélos en 170mm de débattement, suspensions à air, kit de réglage de géométrie... Créés, comme leur nom l'indique, pour toucher le ciel.

Eine ganz neue Kategorie für Mondraker. Es handelt sich hier um die aggressivste Form von Enduro für welche die neuen Modelle Zenith sehr geeignet sind. Räder mit 170 mm Federweg, Luftdämpfer, verstellbare Geometrie Kits... Das Ergebnis, wie der Name schon sagt, ein Bike um den Himmel zu berühren.

The most multifunctional bike of the range, with 140 mm suspension and its system Zero offers a range of advantages going downhill and does not suffer any bobbing effects whilst pedaling. The Stealth (side Alloy Structure) structure converts this bike in one of the lightest alternatives of its league.

Le vélo le plus polyvalent de la gamme, avec ses 140mm de débattement il offre tous les avantages du système Zero en descente et en côte, le pédalage n'a aucune influence sur le système qui est optimisé pour le programme. La structure Stealth (Side Alloy Structure) fait de ce vélo un des plus légers de sa catégorie.

Der meist multifunktionale Bike des ganzen Sortiments, mit 140 mm Federweg und Zero Suspension System, bietet allerhand Vorteile beim Downhill und bei null Pedalrückschlag. Die Konstruktion Stealth (side alloy Structure) sorgt dafür das dieses Model einer der leichtesten Alternativen seinem Segment darstellt.

- > Shimano M445 160mm hydraulic disc brakes
- > Shimano SLX rear derrailleur
- > WTB Nano 2.10 tires
- > Abyss XC 31.8mm components

The Ventura range has had a couple of upgrades as far as the specs are concerned. Proof of it is the hydraulic brakes of model Ventura, the Shimano M171 cranks of model Ventura Sport or the SLX derailleur of model Ventura Pro. If you want to lose some calories or just go for a nice ride through the mountains, this is your bike; it all depends on your state of mind.

Les modèles Ventura reçoivent de nombreuses améliorations au niveau des composants, par exemple, des freins à disque hydrauliques sur le modèle Ventura, des manivelles Shimano M171 sur le modèle Ventura Sport ou un dérailleur SLX sur le modèle Ventura Pro. Des vélos sportifs et polyvalents pour une utilisation quotidienne ou ponctuelle, tout dépendra de ton humeur.

Der Ventura hat dieses Jahr einige verbesserte Spezifikationen. Ein Beispiel sind die hydraulischen Bremsen des Modells Ventura, die Shimano M171 Kurbeln am Model Ventura Sport, und die SLX Kettführung am Model Ventura Pro. Wenn sie einige Kalorien verlieren möchten oder einfach nur eine schöne Fahrt durch die Berge genießen wollen, dann ist das Ventura ideal für Sie, es hängt nur von Ihrem Gemütszustand ab.

- > Urban comfort components

Without losing the Mondraker essence, a new range is being introduced to those who use their bikes as a means of transport. Going to work, to the supermarket or just bringing a visit to your friends with the new Borne is quicker and healthier and at the same time very enjoyable.

Avec la touche et le caractère de Mondraker une nouvelle famille naît pour couvrir les besoins de ceux qui utilisent leur vélo comme moyen de transport. Les Borne transformeront tes trajets au travail, au supermarché ou à la cafétéria en une démarche plus saine et plus rapide.

Ohne wirklich zu weit abzuschweifen von Mondraker's Essenz wird dieses Jahr ein neues Konzept eingeführt, nämlich das Borne. Es ist entworfen worden für diejenige die das Fahrrad als Verkehrsmittel benutzen. Mit dem Borne zu der Arbeit fahren, zum Supermarkt, oder einfach um einige Freunde zu besuchen, dafür ist der Borne sehr geeignet und gleichzeitig macht es Spass damit Sport zu betreiben.

With this bike on the start line you'll be a real eye-catcher but apart from having this great look you are contemplating a real refined machine that allows you to go incredibly fast on any 4X circuit. An extra this year is the upgraded frame with new drop-outs to use single speed.

Derrière cette esthétique tellement cool se cache une bête de précision qui te permettra d'aller très vite sur tous les types de circuits de 4X. En plus d'être le plus rapide tu seras aussi la cible de tous les regards sur le start. Cette année le potentiel est augmenté grâce à la possibilité de régler la longueur des pattes arrière pour rouler en single speed.

Mit diesem Model auf der Startlinie werden Sie ohne Zweifel viel Aufmerksamkeit auf sich lenken. Aber ausser diesem coolen Anblick beobachten Sie jetzt eine richtige feine Maschine mit der Sie fehlerfrei und sehr schnell auf jede 4X Strecke gute Chancen haben als erster ins Ziel zu kommen.

*DECALS KIT INCLUDED

A novelty in the range of the dirt bikes is the new Quarter III, a model without suspension that fully obeys your demands and adapts itself to your own developed style. It's single speed for the full range, 3 inch handlebars and a pivotal saddle system... and on top of this you'll get free stickers to personalize your dirt bike.

La gamme de vélos de champs de bosse par excellence est élargie avec le nouveau Quarter III, ce modèle avec une fourche rigide te permettra d'épurer ton style. Un montage single speed dans toute la gamme, des cintres en 3", des selles avec système Pivotal... Et une plaquette de stickers pour personnaliser ton nouveau bike.

Eine Neuigkeit im Sortiment des Dirt Bikes ist das neue Quarter III, ein Model ohne Stosdämpfer das sich perfekt jeder Strecke und deinem eigenen Stil anpasst. Alle drei Modelle sind mit Single Speed ausgerüstet, 3 inch Lenker und ein Pivotal Sattel System, und obendrein bekommt man noch einige schöne Sticker um das Bike zu personalisieren.

▶ PLAY 1

- > Mondraker Alloy 6061 Square street frame
- > Marzocchi Dirt Jumper 2 100mm fork
- > Shimano M445 180/160mm disc brakes
- > Truvativ Ruktion 1.0 Guide crankset
- > Sram X9 Rear derrailleur
- > Abyss Dual 31.8mm components

Just spectacular, that's how to describe this year's Play range. Anodized rims matching with the stem, pedals and grips... All these little details turn these bikes into real eye catching objects that no one can ignore.

Spectaculaires, tels sont les nouveaux modèles Play cette année grâce à leur esthétique. Les jantes anodisées sont assorties avec la potence, les pédales et les grips... Tous les détails ont été soignés un maximum pour que les vélos ne passent inaperçus aux yeux de personnes.

Einfach sensationell, so kann man das Sortiment Play von 2011 beschreiben. "Eloxierte" Felgen, Vorbau, Pedale und Griffe, alle mit zueinander passenden Farben. Alle diese kleinen Einzelheiten zusammen sorgen dafür dass es unmöglich ist sich nicht die Augen auf dieses sensationelle Objekt zu lenken.

The new Play 20 and 24 have got a new frame, very much like their older sister Play and offer the same characteristics. The bikes have great resistance for which your kids can spend hours and hours enjoying their Play bikes without breaking them. For sure their friends at school or in the neighbourhood will get jealous as soon as they see them. Finally you can give your kids what you have always wanted to have when you were little.

Les nouveaux Play 20 et 24 reçoivent un cadre à l'image de leurs grands frères, comme eux, ils sont synonymes de diversion en plein air pendant des heures, leurs atouts est cette esthétique si particulière faisant des envieux et des périphériques choisis pour résister au pire des traitements. Tu pourras donner à tes enfants ce que tu as toujours rêvé d'avoir.

Das neue Play 20 und 24 werden dieses Jahr mit einem neuen Rahmen angeboten, ähnlich der Rahmen der Play 1,2,3 und bieten dadurch ähnliche Fahreigenschaften. Diese beiden Bikes sind sehr widerstandsfähig damit Ihre Kinder sorgenfrei ihre Bikes genießen können. Sie brauchen keine Sorgen zu haben, die Räder werden es aushalten.

**➤ DUEL TEAM**

- > Mondraker BMX DOT 7005 + CNC frame
- > Sinz SSF-01 Carbon fork
- > Sinz Expert 44t cranksset
- > Sinz Pro 20" wheelset
- > Mondraker-ITS MK-2 20x2.125F / 1.75R tires
- > Onoff BMX CNC anodized stem
- > Two sizes available 20.25" / 21"

The Duel Team is a bike specifically made for the circuit with which you can participate without any fear in any of the World Cup competitions. During the development and production of this style great emphasis was given to avoid any kind a flexion. With this rigidity you feel pure acceleration every time you hit the pedal.

Le Duel Team est un vélo spécifique de circuit capable de disputer n'importe quelle épreuve de Coupe du Monde. Fabriqué en prêtant une attention toute particulière à annuler toutes les flexions pour que chaque coup de pédale ne soit qu'énergie pure. Disponible en deux tailles.

Das Model Duel Team wurde speziell entworfen für BMX, mit dem man problemlos am erstbesten Weltcup Wettbewerb teilnehmen kann. Beim Produktionsprozess dieses Modells wurde viel Nachdruck darauf gelegt einen steifen Rahmen zu konstruieren und das ist auch gelungen. Bei diesem steifen Rahmen fühlst du sofort die Beschleunigung bei jedem Tritt in die Pedale.

 540°

- > Mondraker Slim Cromoly 20" frame
- > Mondraker Hi-Ten Freestyle fork
- > Integrated ahead-set
- > Prowheel Chromoly 3pcs cranksset
- > Mondraker BMX pivotal saddle
- > Abyss Indy BMX components

New frame and new geometry on all models because of a shorter chainstay and seat tube. This year the models 360° and 180° inherit specs of their older sister like for instance the new stem Abyss Indy, U-brake and the pivotal saddle system, all this to make them look even cooler.

Un nouveau cadre avec une géométrie plus pointue, des bases plus courtes et un tube de tige de selle plus bas sur tous les modèles. Cette année les modèles 360° et 180° héritent des composants de leur grand frère comme la nouvelle potence Abyss Indy, des freins U-brake et une selle fine avec le système Pivotal qui leur donnent une esthétique plus cool...

Alle Modelle haben dieses Jahr neue Rahmen und eine neue Geometrie. Dank der kürzeren Kettenstreben und Seat Cups. Für die Modelle 360° und 180° wurden bestimmte Spezifikationen vom 510° übernommen, wie z.B. der neue Vorbau Abyss Indy, U-Brake und das Pivotal Sattel System so dass die Bikes noch cooler aussehen.

➤ FACTOR S GO

- > Mondraker 6061 Hydroformed alloy DBA frame
- > Rock Shox Tora TK Coil 120mm fork
- > Manitou Radium Expert Lock Out rear shock
- > Onoff Rail Wheelset
- > Avid Juicy 3 180/160mm brakes
- > Race Face Ride components

For the most challenging girls/women that would like to enjoy riding a MTB, for both pedaling up and going downhill, the Factor S range offers model GO 120mm, with certain adaptations on the specs to make this bike become your best friend.

Pour les plus aventurières, celles qui s'amusez autant en montant qu'en descendant, la gamme Factor S présente son modèle G.O., proposant de légères mutations pour l'adapter à la morphologie féminine. 120mm de débattement feront de ce All Mountain le compagnon idéal de tes randonnées.

Für die Damen die auch gerne MTB fahren bietet Mondraker den Factor S Go an. Sowohl bergab als auch den Berg hinauf geht es problemlos dank einiger spezifischer und technischer Änderungen, damit die weiblichen Fahrer auch 100 % das Factor genießen können.

VENTURA GO

- > Spin Hydroformed alloy with Integrated Stay Design frame
- > Go specify geometry
- > Suntour XCT lock out 100mm fork
- > Tektro Draco 160mm hydraulic disc brakes
- > Shimano Acera drivetrain
- > Abyss XC 31.8mm components

All the characteristics of the Ventura range offered to our female riders. An adapted geometry for female posture, a fork with softer compression, a shorter stem, a smaller handlebar, foam grips and a special specific saddle make this bike very comfortable during the ride.

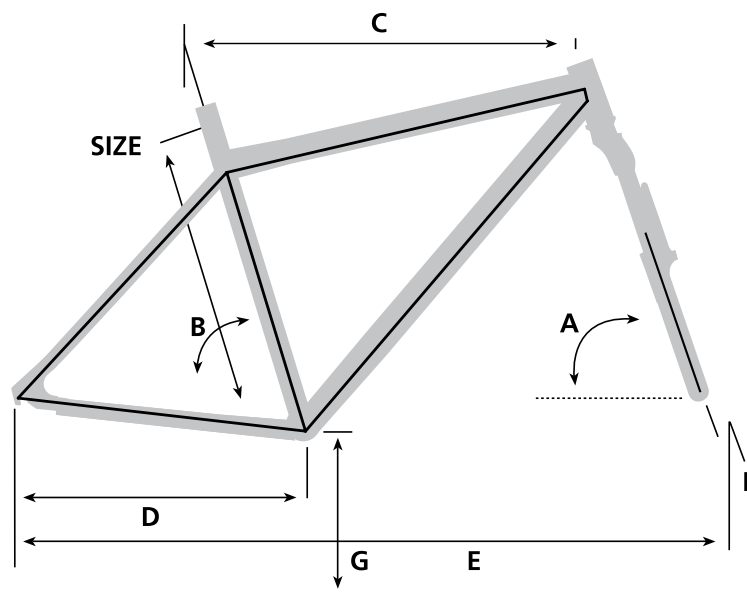

Toutes les caractéristiques de la gamme Ventura mises à disposition des femmes. Une géométrie adaptée à leur morphologie, avec une fourche plus souple, une potence plus courte, un cintre plus étroit, des grips en mousse et une selle spécifique, autant de changements synonymes de confort lors des randonnées.

Alle Kennzeichen vom Model Ventura wurden übernommen, aber jetzt abgestimmt auf unseren weiblichen Fahrer mit einer modifizierten Geometrie, einer weicheeren Gabel, kürzeren Vorbau, schmaleren Lenker, Schaumgummi Griffe und einem speziellen Sattel, damit dieses Bike einfach optimal ist für unsere Damen.

Zero is the name of Mondraker's proprietary suspension system and has been used on almost all of its full suspension bikes from the 2011 collection. The advantage that this suspension system provides is evident in all MTB riding from Trail/Marathon with 120mm travel to 200mm travel downhill bikes, covering all categories in between like All Mountain, Enduro and Freeride. The Zero suspension system has been optimized and adapted for every use or category and differentiates itself clearly from other suspension systems.

The Zero suspension system is used in the suspension frames of, Factor 120mm, Foxy 140mm, Dune 160mm, Zenith 170mm, Durham 180mm and the Summum at 200mm travel.

The most significant difference of the Zero system is that the rear shock is floating between two links and is compressed from both ends. Depending on the optimization of the system and based on its usage, the lower link compresses the rear shock an average of about 35 % of its total length and the upper link approximately 65%. The positioning of the rear shock together with the compression that the shock receives from both sides makes this system unique.

Zero est le nom du système de suspension breveté par Mondraker qui donne vie au cœur de la gamme des tout suspendus pour cette saison 2011. Il sera possible de bénéficier de ces nombreux avantages dans les différentes modalités du VTT actuel; de la pratique Trail ou Marathon avec les suspensions en 120mm jusqu'à la descente en 200mm, en passant par les catégories All Mountain, Enduro et Freeride. Le système a été optimisé selon les besoins spécifiques de chaque discipline tout en maintenant les avantages exclusifs qui le différencient des autres.

Le système de suspension Zero est présent sur les séries Factor en 120mm de débattement, Foxy en 140mm, Dune en 160mm, Zenith en 170mm, Durham en 180mm et Summum en 200mm.

La principale différence du système Zero réside dans le fait que l'amortisseur est flottant entre les deux biellettes, d'autre part, ces biellettes compriment l'amortisseur de manière évidente par ses deux extrémités. Dépendant de la mise au point du système basée sur chaque pratique, la biellette inférieure comprime en moyenne 35% de la course totale de l'amortisseur alors que la biellette supérieure le comprime de 65%. La position de l'amortisseur et sa compression des deux côtés est ce qui rend le système unique sur le marché.

Zero ist ein, auf Mondraker registriertes Federungssystem und findet Verwendung bei fast allen vollgefederten Bikes der Modellreihe 2011. Der Vorteil, den diese System zur Verfügung stellt nutzen wir in allen unterschiedlichen Mountainbike Kategorien angefangen mit Trail und Maraton mit 120mm Federweg bis hin zu unseren Downhill Bikes mit über 200mm Federweg und selbstverständlich auch bei allen Kategorien dazwischen. Das Zero Suspension System wurde für jede dieser Kategorien optimiert und angepasst und unterscheidet sich klar von anderen Systemen.

Das Zero Federungssystem findet Verwendung bei der Factor Serie mit 120 mm Federweg, Foxy mit 140 mm, Zenith 170 mm, Durham 180 mm und Summum 200 mm Federweg.

Der bedeutendste Unterschied des Zero Suspension Systems ist, dass der Dämpfer schwimmend zwischen beiden Gelenken aufgehängt ist und daher von beiden Seiten angesteuert wird. In Abhängigkeit des Einsatzzwecks wurde dieses System auf die jeweiligen Modelle angepasst. Dabei erfährt der Dämpfer eine durchschnittliche Ansteuerung des unteren Gelenks von ca. 35% und des oberen Gelenks von ca. 65% bezogen auf den gesamten Hub des Dämpfers. Die Position des Dämpfers im Zusammenspiel mit der Ansteuerung von beiden Seiten machen dieses System so einzigartig.

There are four key points that make the Zero suspension system so incredibly effective:

- **Zero power loss**

Peddalling and suspension forces are perfectly balanced and it prevents any unwanted movements produced whilst pedalling, resulting in maximum efficiency without extra compression or extension of the rear suspension.

- **Zero pedal kickback**

Chain length growth throughout the suspension travel is insignificant avoiding any backward movement of the crank set that could lead to poor pedalling efficiency or cadence.

- **Zero brake jack**

The brake forces do not alter the suspension system. The rear shock will absorb impacts without changing its function whilst using the rear brake.

- **Zero bumps**

The main characteristic of the system is its excellent absorption capacity at the same time high pedalling efficiency. The optimized trajectory of the rear axle and the linear nature of the rear shock assure very effective impact absorption.

Le système Zero se caractérise par son grand rendement basé sur quatre points principaux :

- **Zero perte d'énergie**

Le système neutralise tous les possibles va-et-vient induits par le pédalage, la force appliquée sur les pédales se traduit en poussée immédiate sans créer de mouvements non nécessaires de compression ou d'extension de l'amortisseur.

- **Zero interférence avec le pédalage**

L'élongation de la chaîne est imperceptible sur tous le débattement, aucun étirement ou décroissance n'affecte l'obtention d'un pédalage rond.

- **Zero interaction avec le freinage**

La configuration du système n'étend ni ne comprime la suspension lorsque le frein arrière est actionné. La suspension continue d'absorber sans changer de comportement face aux forces produites par l'étrier quel que soit le freinage.

- **Zero trou**

La principale caractéristique du système est son excellente capacité d'absorption unie à chaque instant à son efficacité de pédalage. La trajectoire de l'axe de roue arrière et son caractère linéaire font disparaître tous types d'impacts.

Vier wichtige Punkte machen diese System so unglaublich effizient:

- **Zero power loss**

Die auftretenden Kräfte beim Pedalieren und der Federung sind perfekt aufeinander abgestimmt und verhindern ungewollte Bewegung während des Pedalierens. Maximale Effizienz ohne dass der Stoßdämpfer eine Bewegung erfährt.

- **Zero pedal feedback**

Die Veränderung der Kettenstrebenlänge durch den Federweg hindurch ist bei diesem System unerheblich und verhindert eine Rückwärtsbewegung der Kurbel was eine Verschlechterung des Pedalierens zur Folge hätte.

- **Zero brake jack**

Die Bremskräfte beeinflussen das Federungssystem nicht und sind vollständig entkoppelt. Der Stoßdämpfer absorbiert Schläge ohne Funktionsverlust bei Einsatz der Bremse.

- **Zero bumps**

Die Hauptcharakteristik dieses Systems ist die großartige Dämpfungseigenschaft bei gleichzeitig hoher Effizienz beim Pedalieren. Der optimierte Weg der hinteren Achse in Verbindung mit der Kennlinie des Stoßdämpfers stellen eine sehr effektive Aufnahme von Schlägen sicher.

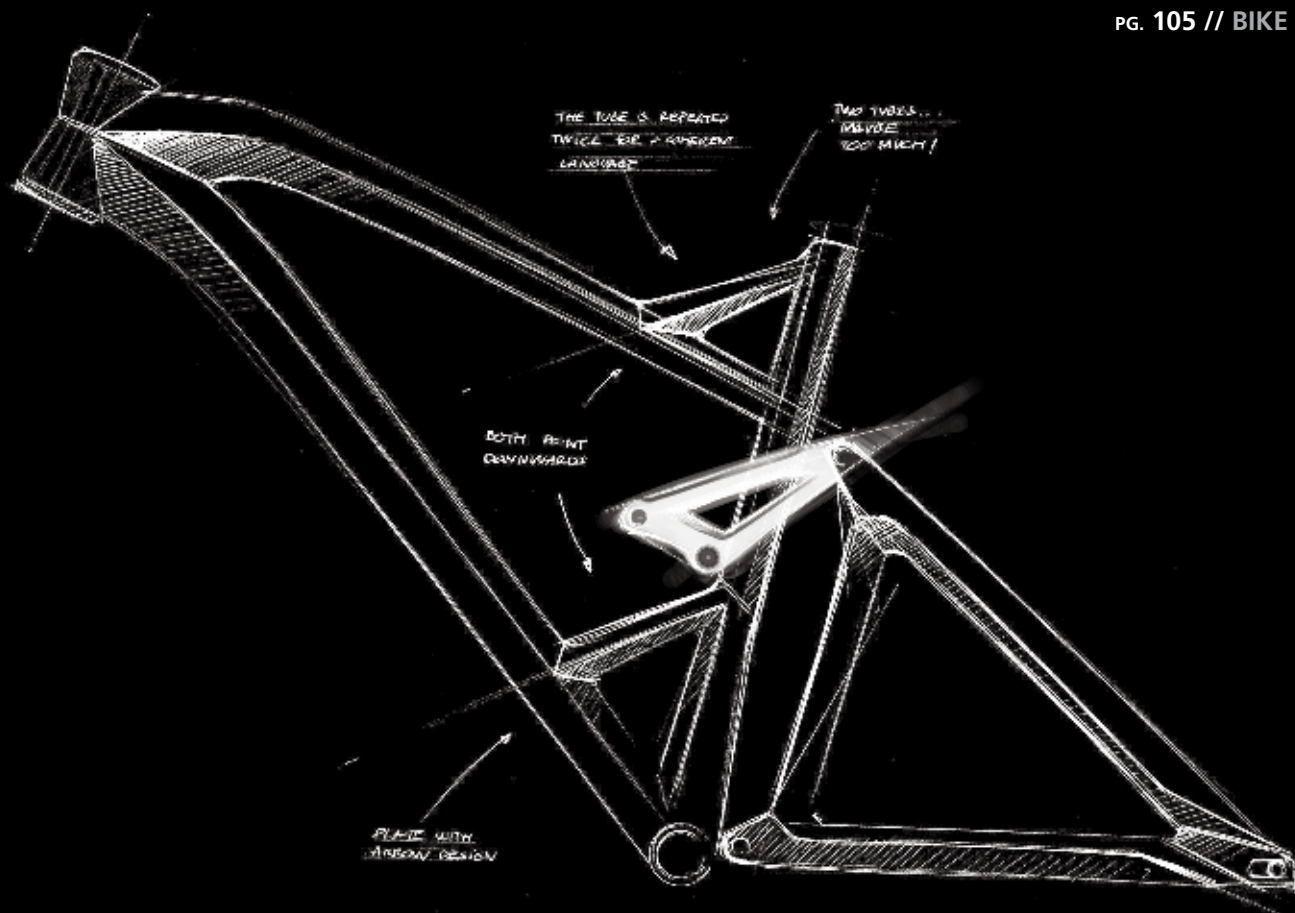

stealth
side alloy structure

The Stealth Technology used for the Mondraker 2011 range is state of the art in terms of Industrial-Design and Structure-Optimization. Stealth comprehends all processes from the inspiration and creation of the first designs, to the calculation of the most precise details assuring and optimizing every single specific part of the structure.

La technologie Stealth représente le dessin industriel le plus novateur et l'optimisation des structures la plus poussée dans la gamme Mondraker 2011. Stealth regroupe tous les processus de création de cadre, depuis l'inspiration et la conception du dessin industriel jusqu'au calcul des éléments finis qui assurent et optimisent chaque une des parties pour une fonction spécifique.

Die Stealth Technologie, die bei den Mondraker Modellen von 2011 Anwendung fand kann ohne Umschweife als ein Höhepunkt bezogen Industriedesign und Strukturoptimierung bezeichnet werden. Stealth umfasst alle Prozesse von der Inspiration und der Erschaffung eines neuen Designs bis hin zur Kalkulation des kleinsten Details und der Optimierung jedes einzelnen Teils der Struktur.

The Stealth technology is completely new, characterised by the rectangular shapes used in manufacturing as opposed to the more traditional round tubes. Each tube is carefully designed to carry out a specific function. By optimizing the production process, selecting the best materials, using tapered tubing and a selection of different alloys we can create an ultra-light tube set that is more resistant and rigid in the high stress areas of the frame.

A perfect result of the Stealth Technology is in the ultra-light, ultra-strong downhill bike the Summum Pro Team; with a complete 15.5 KG weight it represents the best production World Cup Winning bike on the market today.

Stealth Technology is also used in other frames within the Mondraker Range: the Factor, Foxy, Dune, Zenith, Durham and Summum. Now you have Stealth for any type or style of riding from 120mm to 210mm travel.

Stealth promeut un design novateur, éloigné des formes courbes et arrondies, dans lequel les faces plates et les arêtes sont sous les feux de la rampe et s'unissent pour former un tout. Chaque tube et chaque partie sont conçus pour jouer un rôle bien déterminé avec le poids le plus léger possible, en travaillant sur le processus, les matériaux et les épaisseurs, ainsi que sur l'utilisation de différents alliages qui apportent résistance et rigidité aux endroits essentiels.

Le vélo de descente Summum Pro Team avec son poids de 15,5 Kg est l'étendard de la technologie Stealth. Un vélo capable de gagner des courses de Coupe du Monde de DH avec une rigidité et une résistance hors normes alliées à un poids record.

La technologie Stealth est utilisée sur les séries Factor, Foxy, Dune, Zenith, Durham et Summum.

Das Stealth Design ist komplett neu und charakteristisch durch die rechteckige Formgebung im Gegensatz zu konventionellem Design. Alle Rohre und Teile sind mit Sorgfalt entworfen um einer spezifischen Funktion zu folgen und gleichzeitig so leicht wie möglich zu sein. Der Produktionsprozess wurde so weit optimiert und durch Verwendung des bestmöglichen Materials, unterschiedlicher Wandstärken und verschiedener Aluminiumlegierungen bestmögliche Steifigkeit und Widerstandsfähigkeit sicherzustellen.

Ein perfektes Resultat der Stealth Technologie ist das ultra leichte Downhill Bike Summum Pro Team mit 15,5kg. Eine echtes Weltmeister Bike mit bester Steifigkeit und Widerstandskraft.

Die Stealth Technologie findet Anwendung in den Modellreihen Factor, Foxy, Zenith, Durham und Summum.

FABIEN BAREL

DAMIEN SPAGNOLO

AURÉLIEN GIORDANENGO

After news hit that team leader Fabien Barel had sustained a serious injury one week before the first round of the World Cup the outcome to the season looked bleak. However with some super strong performances from the rest of the team the season ended on a high.

After a really strong showing early season winning all the pre-season races the DH World Cup series seemed set to be a very successful year for Fabien and the Mondraker Factory Team. With all the preparations done the injury was a big blow but ever positive Fabien himself commented "It's all part of the game". Fabien has shown previously that he has incredible mental strength and we are in no doubt that he will be back to the top and eager to perform next season.

With Fabien out of the fray it was left to the rest of the team to step up to the plate and boy did they step up! Damien Spagnolo as Fabiens successor didn't take much time in setting the results board alight with a podium place in the Champéry round of the DH World Cup series. Not wanting to be left out Aurélien Giordanengo took home the French 4X Championship. Thank you guys for an awesome season and here's looking forward to next 2011 with the team back to full strength.

C'est une année aigre-douce pour le Mondraker Factory Team lors de laquelle les bonnes nouvelles ont été succédées par d'autres moins bonnes. Néanmoins, la fin de saison venue, le bilan est positif grâce au travail de toute l'équipe.

La tête de l'équipe Fabien Barel s'est grièvement blessé une semaine avant le début de la Coupe du Monde de descente, mettant fin à une pré saison lors de laquelle il remporta toutes les courses auxquelles il avait participé. Le travail été déjà fait, tout été poli, huilé et fonctionnait à merveille laissant présager une grande saison... Mais comme dit Fabien : "Ça fait parti du jeu". Il a montré lors d'autres occasions une force mentale à la hauteur du champion et nous sommes sûr qu'il nous donnera à nouveau de grandes joies la saison prochaine.

Le reste de l'équipe continua de travailler d'une manière exemplaire et faisant confiance à Damien Spagnolo comme successeur du double champion du Monde les résultats ne se sont pas fait attendre. D'abord Aurélien remporta le Championnat de France de 4X et un peu plus tard Damien franchissait un cap dans sa carrière professionnelle en atteignant le podium de la WC DH de Champéry prouvant qu'aussi bien lui que le Summum font parti du Top Five mondial. Bienvenue Damien!

Es war ein schwieriges Jahr für den Mondraker Factory Team seid der Nachricht bezüglich die Verletzung des Teamführers.

Nach einem sehr guten Pre-Season wo er alle Wettbewerbe gewonnen hat da wo er teilgenommen hat, wurde der Teamführer Fabien Barel genau eine Woche vor dem Anfang des World Cups Downhill schwer verletzt. Die Arbeit war eigentlich schon gemacht, alles deutete darauf dass es eine sehr gute Saison würde. Aber es ist genau so wie Fabien selber sagt " Es gehört beim Spiel". Fabien hat schon öfter gezeigt eine starke Mentalität zu haben and wir sind davon überzeugt dass er die nächste Saison wieder einen der besten sein wird.

Seine Teamkamaraden machten einfach weiter and haben Damiel Spagnolo ernannt als Fabien's Nachfolger. Die erste Ergebnisse haben nicht lange auf sich warten lassen. Aurelien hat die Französische 4X Meisterschaft gewonnen, und kurze Zeit danach hat Damien die fünfte Position erreicht von der DH Meisterschaft in Champéry. Damit zeigt Damien dass sowohl er als das Summum Pro team zu den besten Fünf der Welt gehören. Willkommen Damien.
