**MOVING
FORWARD**
FORWARD

BIKE 2013

2012 has not been our best year... On 15 May we suddenly lost one of the pillars of the company, Luis Miguel Sánchez, who was our guru and head of design and image at Mondraker from year one right up to that very moment. This 2013 catalogue provides a detailed look at his latest work and faithfully portrays everything that he advocated. There is no better way to pay tribute to him.

In spite of everything, as the title puts it we are moving forward by demonstrating the effectiveness and performance of the Zero system with Brook MacDonald's victory on his Summum in the last round of the DH World Cup in Val d'Isère. Plus we are also moving on in a new season packed with new developments such as the even faster Summum, the bestselling Factor 29er and the race-devouring Podium Carbon 29er, with the standout being the spectacular Forward Geometry which is set to be a turning point for the company. Time will tell. A new way of understanding the geometry of a pure MTB in which the advantages of control and manoeuvrability will mean you can enjoy your rides like never before.

2013 is the year.

2012 n'a pas été la meilleure année... Le 15 Mai nous perdions subitement un des piliers de la compagnie, Luis Miguel Sánchez, il était le gourou et le principal responsable du design et de l'image de Mondraker depuis le début jusqu'à ce jour. Ce catalogue 2013 nous montre en détail sa dernière œuvre et représente fidèlement toutes les idées qu'il défendait. Il n'y a pas de meilleure manière de lui rendre hommage.

Pourtant, et comme l'indique le titre, il faut aller de l'avant. L'efficacité et le rendement du système Zero est une fois de plus démontré avec la victoire de Brook MacDonald et de son Summum lors de la dernière Coupe du Monde de DH à Val d'Isère... nous continuons à avancer avec une nouvelle collection remplie de nouveautés. Depuis le nouveau et plus rapide Summum, en passant par le best seller Factor 29er jusqu'au super compétiteur Podium Carbon 29er. Par dessus tout le reste la spectaculaire Forward Geometry fait son apparition et marquera une nouvelle étape pour la marque, elle représente une nouvelle compréhension de ce qu'est un pur VTT, les avantages sur le contrôle et la manœuvrabilité te feront profiter des sorties comme jamais auparavant.

2013, c'est l'année.

2012 war nicht das beste Jahr... Am 15. Mai haben wir plötzlich einen der Stützpfeiler unseres Unternehmens verloren: Luis Miguel Sánchez. Er war vom Gründungsjahr bis zu jenem Moment Guru und Hauptverantwortlicher für Design und Image von Mondraker. Der Katalog 2013 zeigt im Detail seine letzte Arbeit und spiegelt treu all die Ideen und Konzepte wider, für die er sich einsetzte. Besser könnten wir ihm nicht Tribut zollen.

Trotzdem - und wie der Titel verraten lässt - bewegen wir uns vorwärts und beweisen die Effektivität und Leistung des Zero Suspension Systems mit dem eindeutigen Sieg von Brook MacDonald und seinem Summum in der letzten DH-Weltmeisterschaft in Val d'Isère... und halten uns weiterhin auf Vorwärtstours; die neue Saison präsentiert zahlreiche Neuigkeiten - vom noch schnellsten Modell Summum über den Verkaufsschlager Factor 29er bis zum Gewinnermodell Podium Carbon 29er. Jedoch stellt die spektakuläre Forward Geometry das Highlight der Saison und einen wirklichen Wendepunkt für die Marke dar. Im Laufe der Zeit. Eine neue Form, die Geometrie eines echten MTB zu verstehen. Die Vorteile eines deutlich sicheren Handlings und einer verbesserten Bikekontrolle sorgen für ein bisher unbekanntes MTB-Vergnügen.

2013 ist das Jahr.

Mondraker launches an evolution geometry concept focused on our core bike range. The new **Forward Geometry** presents clear advantages for any categories compared with a traditional geometry, all this benefits are focused to improve the control, handling and riding confidence.

The geometry defines the spirit and performance of any bike, it's the main responsible of our feelings and marks the character of the bike. Mondraker's goal has been to move forward with a better overall geometry. This new concept is inspired on motorbikes geometry, also closer to other extreme applications as BMX or DH, and for sure not accepting the road heritage established a long time ago. Mondraker have taken the current trend that beats for longer top tubes and shorter stems, and carried it till the last consequences; really long top tube and almost not stem length.

The new geometry show longer top tubes completely balanced with shorter stems, the top tube length added is the same that the stem loose, as a result all contact points between the rider and the bike keeps in the same position than a classic geometry, the only difference lies in the front wheel axel that is moved forward. The rest of the geometry don't suffer any change. This is the key of the new **Forward Geometry** concept.

Mondraker lance un nouveau concept de géométrie évolué, ajusté pour les modèles phares de notre collection. La nouvelle **Forward Geometry** présente de clairs avantages dans toutes les catégories en comparaison avec une géométrie traditionnelle, tous ses bénéfices sont centrés sur l'amélioration du contrôle, de la maniabilité et de la confiance.

La géométrie définit l'esprit et le rendement de chaque vélo, elle est la principale instigatrice de nos sensations et elle marque le caractère du vélo. L'objectif de Mondraker a été de faire un bond en avant avec une meilleure géométrie générale. Ce nouveau concept est inspiré des géométries des motos et est aussi proche des disciplines extrêmes comme le BMX ou la DH, évidemment elle n'accepte pas l'héritage établi depuis longtemps par le cyclisme sur route. Mondraker a adopté la tendance actuelle de tubes supérieurs plus longs et des potences plus courtes en la poussant jusqu'à ces derniers retranchements; des tubes supérieurs vraiment longs et une longueur de potence presque nulle.

La nouvelle géométrie propose des tubes supérieurs plus longs compensés par des potences plus courtes, la longueur totale que gagne le tube supérieur est la même que perd la potence, de ce fait tous les points de contact du cycliste avec le vélo se maintiennent exactement au même endroit que sur un vélo avec une géométrie conventionnelle, la seule différence est que l'axe de la roue avant se trouve avancé. Le reste de la géométrie ne change pas. C'est la clé du nouveau concept **Forward Geometry**.

Mondraker stellt mit der **Forward Geometry** eine echte Weiterentwicklung des Mountainbikes vor und hat diese neue Technologie gleich in eine Reihe seiner Kern-Bikemodelle integriert. Im Vergleich zur traditionellen Rahmengeometrie zeigt die Forward Geometry in allen Kategorien eindeutige Vorteile, darunter verbesserte Kontrolle und Lenkbarkeit und damit noch mehr Spass am Mountainbiken.

Die Geometrie definiert den Spirit und die Performance aller Fahrräder und ist damit hauptverantwortlich für das Fahrgefühl und den Charakter eines Bikes. Mondraker verfolgt mit diesem neuen Design das Ziel, einen echten Schritt nach vorne zu gehen und die allgemeine Rahmengeometrie der Fahrradmodelle zu verbessern. Bei diesem neuen Geometrie-Konzept hat Mondraker sich sowohl von Motorrad-Geometrien und anderen Extremsport-Bikes aus dem BMX und DH-Sektor inspirieren lassen und bewusst das traditionelle "Rennrad-Erbe" eliminiert. Mondraker hat ganz im Trend immer längere Oberrohre mit kürzeren Vorbauten kombiniert und diese Idee konsequent bis zum Ende umgesetzt: das Endergebnis zeigt wirklich lange Oberrohre und ultrakurze Vorbaulängen.

Die neue Geometrie basiert auf längeren Oberrohren, die durch kürzere Lenkervorbauten kompensiert wurden: was das Oberrohr an Länge dazu gewinnt, verliert der Lenkervorbau. Dadurch bleiben die Kontaktpunkte des Fahrer mit dem Fahrrad im Vergleich zu den konventionellen Rahmengeometrien unverändert. Der einzige Unterschied besteht darin, dass die Achse des Vorderrads nach vorne versetzt wurde. Sonst bleibt die Bike-Geometrie unverändert. Genau diese Designänderung macht das Konzept **Forward Geometry** so innovativ.

FORWARD GEOMETRY ADVANTAGES

• Security in steep areas

The front axle is more advanced that in any other geometry making almost impossible to go over the bar in steep sections, it feels more secure and confident due to the slacker angle perception.

• Confidence at high speed

The longer wheelbase makes the bike much more stable over any terrain.

• Direct steering

The short stem with only 10mm length allows a lot less handlebar movement to get the same front wheel angle, what changes improves the steering precision and makes the bike very reactive despite the longer wheelbase.

• Uphill precision

The front wheel keeps the contact on the ground avoiding wheelies due the longer front-center length.

• Stability on rough sections

The FG defends a new weight balance between front and rear wheel making possible to load the front wheel a lot more than with a classic geometry. This possibility change your handling giving better grip in cornering and improving the control.

LES AVANTAGES DE LA FORWARD GEOMETRY

• Sécurité dans les pentes raides

L'axe avant est plus avancé que sur n'importe quelle géométrie ce qui rend presque impossible de passer par dessus le guidon dans les pentes très inclinées, elle offre plus de sécurité et de confiance grâce à la perception d'un angle de direction plus ouvert.

• Confiance à grande vitesse

L'empattement plus important rend le vélo beaucoup plus stable sur tous les terrains.

• Direction directe

La potence courte avec seulement 10mm permet avec un moindre mouvement du cintre d'obtenir le même angle de rotation de la roue avant, ce qui améliore la précision de la direction et rend le vélo très réactif.

• Précision en montée

La roue avant garde toujours le contact avec le sol évitant les cabrages grâce à la longueur du front-center.

• Stabilité dans les sections difficiles

La FG défend un nouvel équilibre de masses entre la roue avant et la roue arrière qui rend possible de charger sur la roue avant beaucoup plus que sur une géométrie classique. Cette possibilité change ton pilotage donnant plus de grip en virage et augmentant le contrôle.

VORTEILE DER FORWARD GEOMETRY

• Mehr Sicherheit in steilen Passagen

Die Vorderrad-Achse ist im Vergleich zu allen anderen Geometrieansätzen weiter nach vorne verlagert. In steilen Passagen ist es nun fast unmöglich, über den Lenker zu fliegen. Da man das Gefühl hat, ein Bike mit flacherem Lenkwinkel zu pilotieren, fühlt man sich sicherer und vertraut mehr auf seine Fahrleistungen.

• Mehr Vertrauen bei High Speed

Der längere Radstand trägt entscheidend zur Stabilität des Bikes bei - und zwar in jedem Gelände.

• Direkteres Lenkverhalten

Aufgrund des extrem kurzen 10 mm-Vorbau ist wesentlich weniger Bewegung mit dem Lenker notwendig, um den gleichen Lenkeinschlag des Vorderrads zu erreichen. Dies führt zu einer erhöhten Lenkpräzision und macht das Bike sehr reaktiv.

• Mehr Präzision und Kontrolle im Uphill

Das Vorderrad hält den Kontakt zum Boden und reduziert dank des längeren Hauptrahmendreiecks die Gefahr von ungewollten Wheelies entscheidend.

• Mehr Stabilität in unebenem Gelände

Durch die Forward Geometry wird eine komplette Verlagerung des Schwerpunktes und der Gewichtsverteilung zwischen Hinterrad und Vorderrad erreicht. Auf das Vorderrad wird so viel mehr Druck und Gewicht ausgeübt als bei einer klassischen Geometrie. Diese Möglichkeit eröffnet ein deutlich sichereres Handling, wesentlich mehr Grip in Kurven und eine stark verbesserte Bikekontrolle.

The new Forward Geometry offers new sensations for any category. After a short accommodation period to the bike handling, the overall control improves more than you can imagine. The new geometry makes your riding more stable, reactive and confident, giving you the chance to go faster.

You will enjoy Forward Geometry advantages in all Summum models, as well as Dune XR, Foxy XR and Factor XR.

La nouvelle Forward Geometry offre de nouvelles sensations à toutes les disciplines. Après une courte période d'adaptation et une prise en main du vélo, le contrôle général augmente plus que ce qu'il est possible d'imaginer. La nouvelle géométrie rend ta conduite plus stable, réactive et sûre en te donnant l'opportunité d'aller plus vite.

Il est possible de profiter des avantages de la Forward Geometry dans toute la gamme Summum et sur les Dune XR, Foxy XR et Factor XR.

Die neue Forward Geometry bringt sensationelles Fahrverhalten in allen Bike Kategorien. Nach einer kurzen Eingewöhnungsphase an das neue Handlinggefühl steigert sich die generelle Bikekontrolle merkbar. Das neue Geometrie-Konzept macht das Biken sicherer, reaktiver und stabiler - und gibt Dir damit die Chance noch schneller zu sein.

Du profitierst von den Vorteilen der Forward Geometry bei den Bikemodellen Summum, Dune XR, Foxy XR und Factor XR.

DOWNHILL

SUMMUM PRO TEAM

- _Mondraker Stealth Side Alloy Structure Forward Geometry frame
- _Mondraker Zero Suspension System, 205mm
- _Fox F40 RC2 FIT Kashima 200mm fork
- _Fox DHX RC4 Kashima rear shock
- _Formula Oval 203mm brakes
- _Easton Havoc wheelset

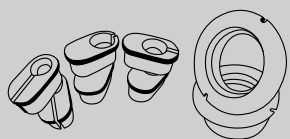

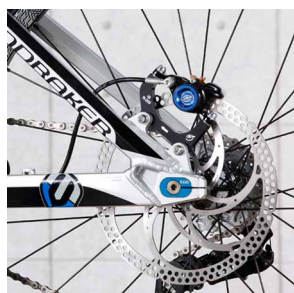

- _Frame available
- _Adjustable Geometry Kit included

The new Summit frame has had an upgrade to offer an even better suspension performance thanks to the new kinematics and the use of bearings in the eyelets of the shock. This together with a new design of the rear triangle allows us to shave off 200g with which the Pro Team version slips underneath the 15kg.

Le cadre Summit a été mis à jour pour offrir un meilleur rendement du système de suspension grâce à la nouvelle cinématique et l'utilisation de roulements sur les axes de l'amortisseur. A cela s'ajoute une nouvelle conception du bras oscillant pour offrir une perte de poids de près de 200g, ce qui situe le modèle Pro Team en dessous des 15kg.

Der neue Summit Rahmen wurde weiterentwickelt, um die Leistung des Hinterbausystems dank einer neuen Kinematik und die Integration von schwingend gelagerten Dämpfern zu verbessern. Dies und das ebenfalls überarbeitete Design des hinteren Dreiecks haben eine Gewichtsreduzierung um fast 200g ermöglicht, so dass das Modell Pro Team jetzt unter 15kg wiegt.

ADJUSTABLE GEOMETRY KIT

The purpose of this kit is to adapt the geometry to your preferences according to your riding style or the type of circuit you use. This way you can make adjustments from an extreme geometry that riders would use during the world cup DH, to a geometry more adequate for Freeride. The kit contains 3 headset reducers made of CNC for 0°, +/- 1° - +/- 2° and 4 different drop-outs to adjust the length of the chainstay into 440mm, 445mm, 450mm or 455mm together with adjustable brake adaptors in accordance to the different lengths of the chainstay.

MONDRAKER TEAM

Thanks **Emmeline**, thanks **Damien**, thanks **Brook**, thanks **Markus** and thanks to all the staff for taking the team to where it deserves to be, the absolute leader of the UCI DH Ranking at the time of writing. A spectacular year in which Summum, the Zero system, Stealth technology and especially the new Forward Geometry have been crucial factors in the DH World Cup. Thanks once again.

Merci **Emmeline**, merci **Damien**, merci **Brook**, merci **Markus** et merci à tout le staff pour hisser le team à la place qu'il mérite, leader absolu du Ranking UCI DH au moment où nous écrivons ces lignes. Une année spectaculaire où le Summum, le système Zero, la technologie Stealth et surtout la nouvelle Forward Geometry ont été des références dans la Coupe du Monde de DH. Une fois de plus, merci.

Danke **Emmeline**, danke **Damien**, danke **Brook**, danke **Markus** und danke an das gesamte Personal, das unser Team dorthin gebracht hat, wo es verdienstermaßen hin gehört - nämlich auf den Spitzenplatz des UCI-DH-Rankings (zum Zeitpunkt des Verfassens dieser Zeilen). Ein spektakuläres Jahr, in dem sich das Summum, das ZERO-System, die Stealth-Technologie und vor allem die Forward Geometry als Meilensteine innerhalb des DH-Weltcups erwiesen. Nochmals vielen Dank.

When Zero means everything.

Zero is the name of Mondraker's proprietary suspension system and is used on all of its full suspension bikes. The Zero System belongs to the category called "Virtual Pivot" suspension systems. The most significant difference of the Zero system in relation to the other alternatives within this category is that the rear shock is floating between two links and is compressed from both ends. Depending on the optimization of the system and based on its usage, the lower plate compresses the rear shock an average of about 35% of its total length and the upper plate approximately 65%. The positioning of the rear shock together with the compression that the shock receives from both sides makes this system unique.

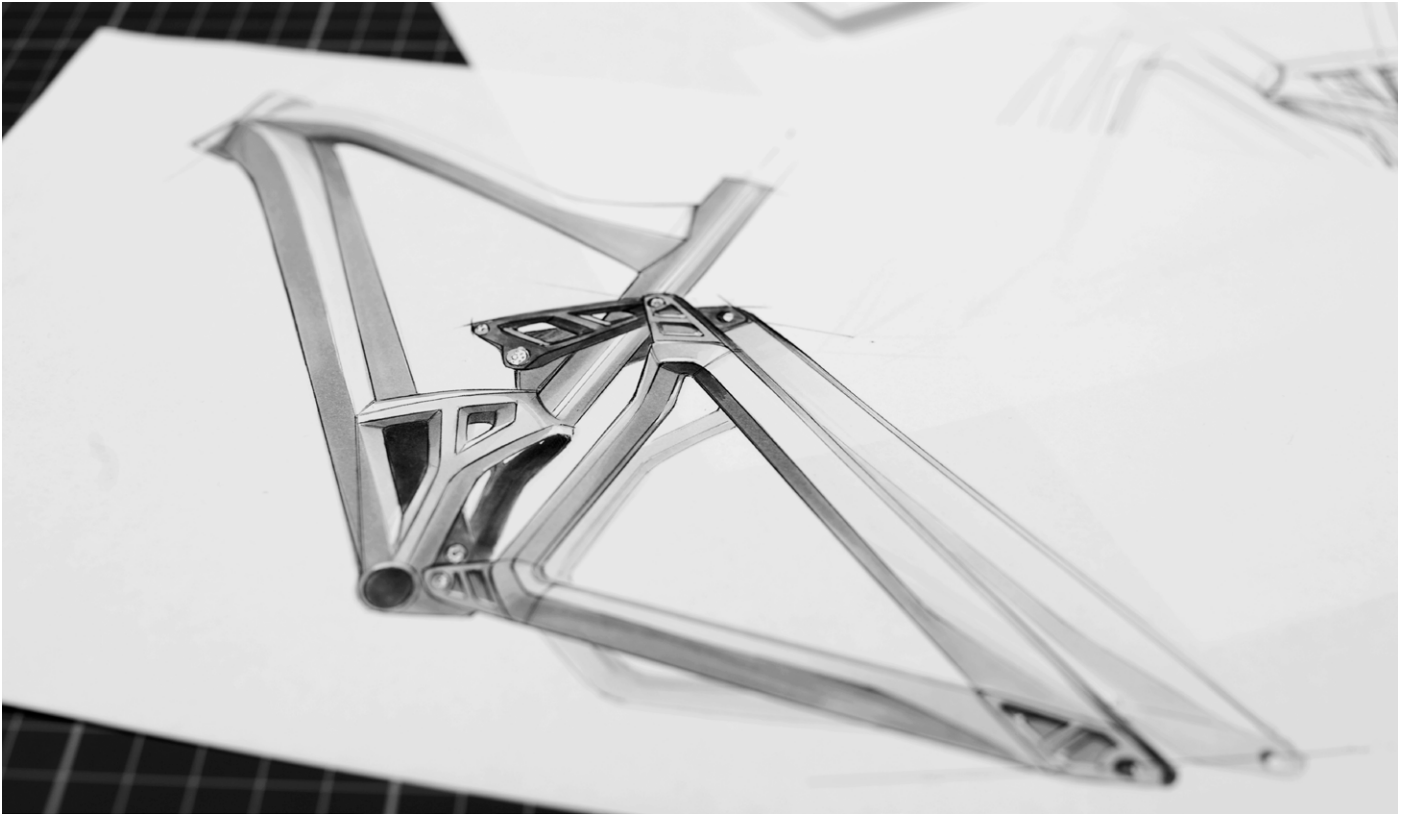

- **Zero power loss.** The system prevents any unwanted movements produced whilst pedalling resulting in maximum efficiency without extra compression or extension of the rear suspension.
- **Zero pedal kickback.** Chain length growth throughout the suspension travel is insignificant avoiding any backward movement of the crank set that could lead to poor pedalling efficiency or cadence.
- **Zero brake jack.** Rear brake forces do not alter the suspension system. The rear shock will absorb impacts without changing its function whilst using the rear brake.
- **Zero bumps.** The main characteristic of the system is its excellent absorption capacity at the same time as it provides high pedalling efficiency. The optimized trajectory of the rear axle and the linear nature of the rear shock assure very effective impact absorption.

Zero est le nom du système de suspension breveté par Mondraker qui donne vie au cœur de la gamme des tout suspendus. Le système Zero appartient à la catégorie de systèmes appelés systèmes à pivot virtuel à cause de sa configuration mécanique. Dans ce groupe, la différence primordiale de Zero réside dans le fait que l'amortisseur est flottant entre les deux biellettes qui articulent le système, d'autre part, ces biellettes compriment l'amortisseur de manière évidente par ses deux extrémités. Dépendant de la mise au point du système basée sur chaque pratique, la biellette inférieure comprime en moyenne 35% de la course totale de l'amortisseur alors que la biellette supérieure le comprime de 65%. La position de l'amortisseur et sa compression des deux côtés sont les points qui rendent le système unique sur le marché.

- **Zero perte d'énergie.** Le système neutralise tous les possibles va-et-vient induits par le pédalage, la force appliquée sur les pédales se traduit en poussée immédiate sans créer de mouvements non nécessaires de compression ou d'extension de l'amortisseur.
- **Zero interférence avec le pédalage.** L'élongation de la chaîne est imperceptible sur tout le débattement, aucun étirement ou décroissance n'affecte l'obtention d'un pédalage rond.
- **Zero interaction avec le freinage.** La configuration du système n'étend ni ne comprime la suspension lorsque le frein arrière est actionné. La suspension continue d'absorber sans changer de comportement face aux forces produites par l'étrier quel que soit le freinage.
- **Zero trou.** La principale caractéristique du système est son excellente capacité d'absorption unie à chaque instant à son efficacité de pédalage. La trajectoire de l'axe de roue arrière et son caractère linéaire font disparaître tous types d'impacts.

Zero ist der Name des von Mondraker patentierten Hinterbausystems für alle vollgefederten Modelle. Das Zero-System gehört wegen seiner mechanischen Konstruktion zu der Kategorie "virtueller Drehpunkt". Der Hauptunterschied zu bestehenden Systemen liegt beim ZERO in dem schwimmend gelagerten Dämpfer. Das System wurde so optimiert, dass der Dämpfer an der unteren Ablenkung um durchschnittlich 35 % und an der oberen Ablenkung um 65 % komprimiert wird. Die Anordnung des Dämpfers und seine beidseitige Komprimierung machen unser System einzigartig auf dem Markt.

- **Null Energieverlust.** Das System neutralisiert alle beim Pedalieren verursachten Bewegungen und die Kraft wird direkt in Vorschub umgewandelt, ohne unnötige Dämpferbewegungen zu erzeugen.
- **Null Interferenzen beim Pedalieren.** Die Verlängerung der Kette ist minimal, so dass Pedal-Vor- oder Rückschlag nicht spürbar ist.
- **Null Bremsbeeinträchtigung.** Die Auslegung des Hinterbausystems bleibt beim Betätigen der Hinterradbremse völlig neutral und aktiv.
- **Null Schlaglöcher.** Die herausragendste Charakteristik des Systems ist seine ausgezeichnete Absorption. Sein analysierter Verlauf der Hinterachse und der lineare Charakter lassen alle Einschläge verschwinden.

The Stealth Technology is the most advanced industrial design and structure optimization technology used in the Mondraker range. Stealth encompasses all processes in the creation of the frame, from the inspiration and creation of the industrial design to the calculation of the most precise details that optimize each part for a specific function.

Stealth offers and innovative design, characterized by flat faces and sharp edges as opposed to the traditional curved or rounded shapes. Each tube and part is carefully designed to carry out a specific function striving to achieve the lowest possible weight of every specific part of the frame. Due to the optimization of the production process, selecting the best materials, using butted tubing technology and applying an alloy of different aluminium, Mondraker's ultra light Stealth frames are extremely resistant with great stiffness, especially in the high stress areas of the frames where it suffers most.

The new Summum Pro Team downhill bike at 14.9kg is the Stealth technology flagship. It's a DH World Cup winning bike with outstanding stiffness and strength and a record braking ultra-light weight.

Stealth technology is used in the Duel, Foxy, Dune, Summum and Dualen series.

La technologie Stealth représente le dessin industriel le plus novateur et l'optimisation des structures la plus poussée dans la gamme Mondraker. Stealth regroupe tous les processus de création de cadre, depuis l'inspiration et la conception du dessin industriel jusqu'au calcul des éléments finis qui assurent et optimisent chacune des parties pour une fonction spécifique.

Le dessin industriel Stealth promeut une conception innovante, éloignée des formes courbes et arrondies, où les faces plates et les arrêtes marquées s'assemblent pour former un tout. Chaque tube et chaque partie sont conçus pour jouer un rôle bien déterminé avec le poids le plus léger possible en travaillant sur le processus, les matériaux et les épaisseurs, ainsi que sur l'utilisation de différents alliages qui apportent résistance et rigidité aux endroits essentiels.

Le nouveau vélo de descente Summum Pro Team avec son poids de 14,9kg est l'étendard de la technologie Stealth. Un vélo capable de gagner des courses de Coupe du Monde de DH avec une rigidité et une résistance hors normes alliées à un poids record.

La technologie Stealth est présente sur les séries Duel, Foxy, Dune, Summum et Dualen.

Stealth bedeutet fortschrittlichste Technologie in den Bereichen Industriedesign und Strukturoptimierung bei Mondraker. Stealth umfasst alle Stufen der Rahmenentwicklung von der Idee über die Konzeption des Industriedesigns bis zur Berechnung aller Feinheiten.

Stealth fördert ein innovatives Design, weit entfernt von den gekrümmten oder abgerundeten Formen; vorherrschend sind die flachen Flächen und lebendigen Kanten, die zusammen ein Ganzes bilden. Jedes Rohr und jedes Teil wurden für eine konkrete Funktion mit einem möglichst geringen Gewicht entworfen; die verschiedenen Legierungen tragen zur Widerstandsfähigkeit und notwendigen Steifigkeit bei.

Das neue Bike Summum Pro Team mit einem Gewicht von 14,9kg ist der ausgesprochene Standard der Stealth-Technologie. Ein Bike mit einer ausgezeichneten Steifigkeit, einer Widerstandsfähigkeit und einem authentischen Rekordgewicht, mit dem man Weltcup-Rennen gewinnen kann.

Die Serien Duel, Foxy, Dune, Summum und Dualen haben die Stealth-Technologie.

Dune XR / Dune RR / Dune R / Dune

DUNE XR

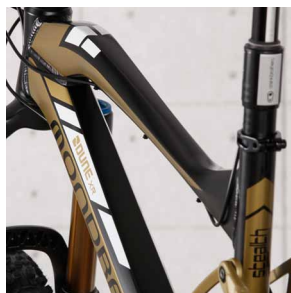

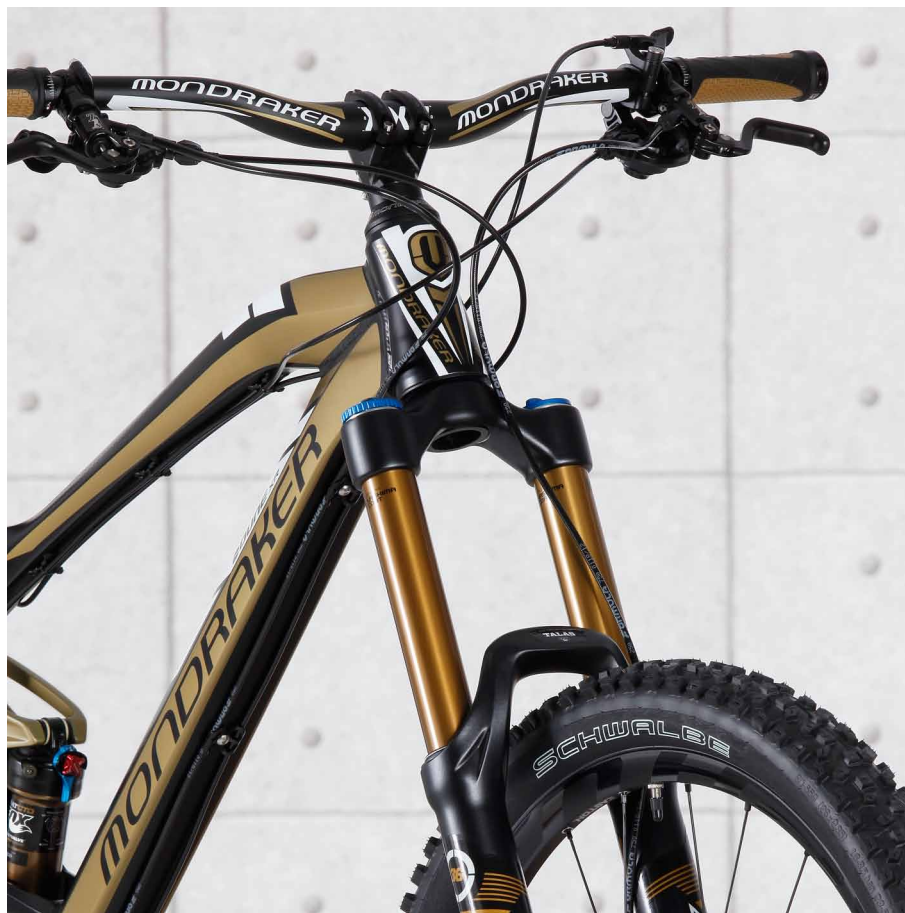

- _Mondraker Stealth Side Alloy Structure Forward Geometry frame
- _Mondraker Zero Suspension System, 160mm
- _Fox 36 Talas RC2 Fit Kashima 180mm 20mm fork
- _Fox Float CTD LV BV Kashima rear shock
- _Easton Haven wheelset
- _CrankBrothers Kronolog seatpost
- _Frame available

The Dune XR takes you to the wildest side of Enduro. Uphill is not an issue anymore with a 180mm travel bike at the front and 160mm at the back. With the Forward Geometry the possibilities offered by the new Dune XR will be beyond all your expectations.

Le Dune XR te transportera vers le côté le plus sauvage de l'Enduro. Monter n'est plus un problème pour un vélo avec une suspension avant en 180mm de débattement et 160mm à l'arrière. Avec la Forward Geometry les possibilités offertes par le nouveau Dune XR n'étaient jusqu'à aujourd'hui concevables que dans tes rêves les plus fous.

Das Dune XR befördert Dich in den Bikekategorie der Super-Enduros. Das Bike mit 180mm Gabelfederweg am Vorderrad und 160mm Federweg am Hinterbau macht auch bergauf eine gute Figur. Mit der Forward Geometry bietet dir das neue Dune XR unvorstellbare Möglichkeiten.

All the XR models are meant for a more extreme use within every of its categories. Our philosophy behind this concept is:

- 20mm more travel on the fork than at the rear, always using the Foxy Talas.
- Maxle through axle (RockShox Maxle) and ISCG 05 ready frame.
- Telescopic seatpost – remote on handlebar.
- Wider tires than the ones of the standard categories.
- Different shock-tuning with lower compression compared to the ones of the standard categories.

DUNE RR

- _Easton Vice 12x135 wheelset
- _CrankBrothers Kronolog seatpost
- _Frame available

The entire Dune category is equipped with the new Fox 34 with 160mm allowing us to save a bit of weight. Dune literally reflects the Enduro concept.

Tous les Dune ont été renforcés avec la monte des dernières fourches Fox 34 qui offrent 160mm de débattement et un poids contenu. Le Dune est l'expression même du concept Enduro.

Alle DUNE-Modelle sind mit den MTB-Federgabeln Fox 34 ausgerüstet, die eine 160mm Federgabel mit einem optimalen Verhältnis aus Gewicht und Leichtigkeit kombinieren. Die Dune-Modelle sind auf die speziellen Anforderungen des Enduro-Einsatzes ausgelegt.

Foxy XR / Foxy RR / Foxy R / Foxy

ALL MOUNTAIN

FOXY XR

- _Mondraker Stealth Side Alloy Structure Forward Geometry frame
- _Mondraker Zero Suspension System, 140mm
- _Fox 34 Talas CTD Fit Kashima 160mm 15QR fork
- _Fox Float CTD XV BV Kashima rear shock
- _CrankBrothers Iodine 3 12x135mm wheelset
- _CrankBrothers Kronolog seatpost

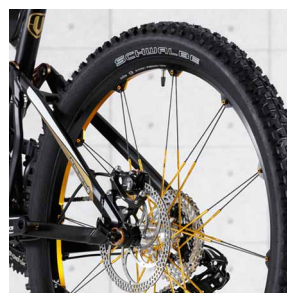

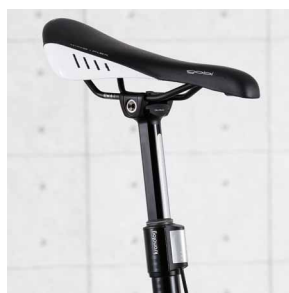

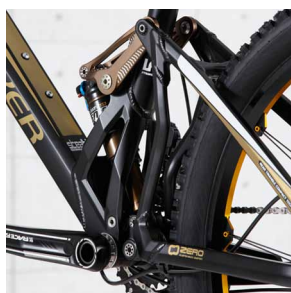

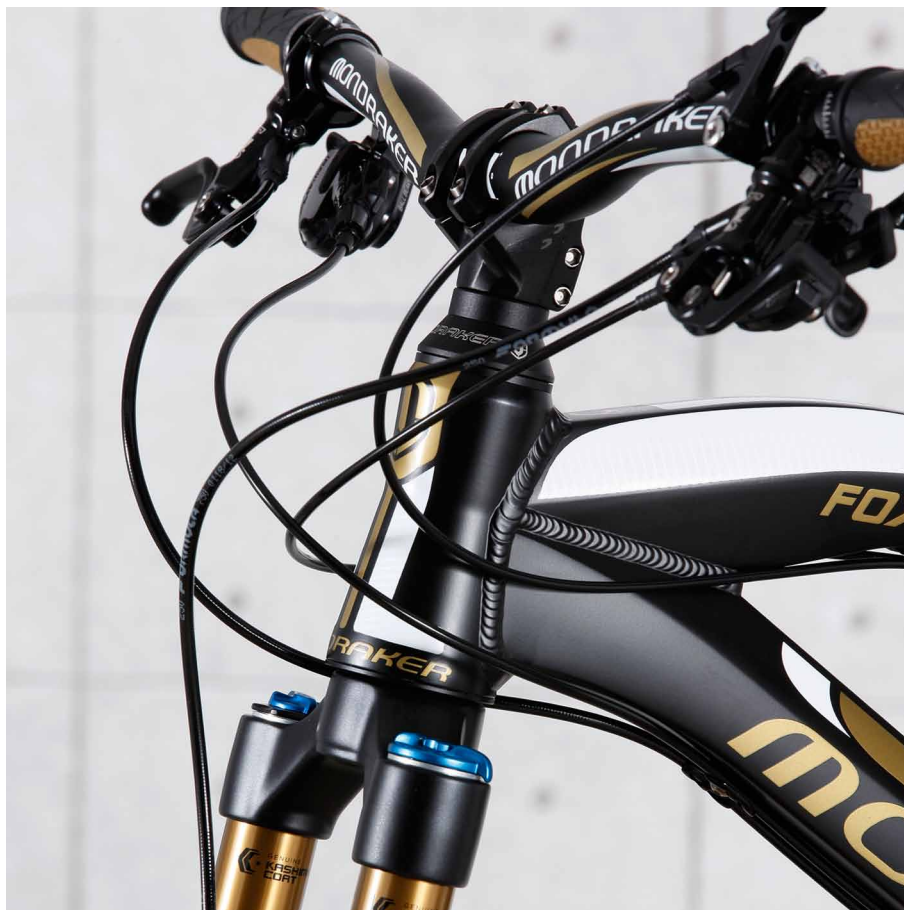

- _Frame available
- _Mudguard as optional

The Foxy XR offers much more than what its 140mm of rear travel theoretically gives. Easy uphill and fast and secure descents is something every rider dreams of, and from now that's possible thanks to the Forward Geometry.

Le Foxy XR est un vélo beaucoup plus capable que ce qu'indiquent ses 140mm de débattement arrière. Monter avec aisance et descendre avec toutes les garanties est un idéal pour tous les pilotes, c'est aussi une réalité avec la Forward Geometry.

Das Foxy XR verspricht mehr Leistung und Spaß als sein hinterer Federweg von 140mm verraten lässt. Uphills lassen sich mit Leichtigkeit und Downhills mit Komfort und Sicherheit überwinden. Fahrleistungen, von denen jeder Rider nur träumen kann, sind jetzt dank der Forward Geometry Realität geworden.

All the XR models are meant for a more extreme use within every of its categories. Our philosophy behind this concept is:

- 20mm more travel on the fork than at the rear, always using the Foxy Talas.
- Maxle through axle (RockShox Maxle) and ISCG 05 ready frame.

The most multifunctional bike of the range, with 140mm suspension and its system Zero offers a range of advantages going downhill and does not suffer any bobbing effects whilst pedaling. The Stealth structure (Side Alloy Structure) converts this bike in one of the lightest alternatives of its league.

Le vélo le plus polyvalent de la gamme avec ses 140mm de débattement, il offre aussi tous les avantages du système Zero et grâce à l'optimisation de celui-ci il n'y a pas d'interférences avec le pédalage. La structure Stealth (Side Alloy Structure) fait de lui l'un des vélos les plus légers de ce segment.

Das Bike mit dem größten Einsatzbereich unseres Sortiments mit 140mm Federweg und allen Vorteilen des Zero-Suspension-Systems beim Downhill mit null Pedalrückschlag. Die Stealth-Struktur (Side Alloy Structure) trägt dazu bei, dass dieses Bike zu den leichtesten des Segments gehört.

Zero Suspension applied on a 29er, a challenge that has exceeded all our expectations. The 110mm of travel together with a very compact geometry make the new Factor 29er an amazingly agile "mile shredder".

Le système de suspension Zero sur un 29er, c'est un défi que le Factor a relevé avec brio. Ses 110mm de débattement avec une géométrie compacte font de ces nouveaux Factor 29er des "dévoueurs de kilomètres" très maniables.

Das Zero-Suspensions-System in einem 29er, eine Herausforderung, die bei den Factor-Modellen mehr als erfolgreich gemeistert wurde. Der 110 mm Federweg und die besonders kompakte Geometrie machen aus den neuen Modellen Factor 29er einen gut lenkbaren "Kilometerfresser".

stealth

SIDE ALLOY STRUCTURE

2.0

A better one follows every great idea. Stealth 2.0 is the evolution of the Stealth technology to a new level of features and finishes.

The industrial design has been made even more dynamic to provide more fluidity and speed to each of the tubes, achieving a lighter visual weight and a more attractive look. The characteristic flat and rectangular faces and sharp edges of the original Stealth are combined with a 90 degrees tube twist increasing so the torsional rigidity of the entire frame.

This evolution uses all the knowledge gained from the Stealth tubing to streamline manufacturing processes and reduce weight without sacrificing strength. Stealth 2.0 uses an exclusive aluminium alloy in the 6000 series to reduce internal thicknesses and is butted to achieve a final weight that's a real record.

Stealth 2.0 technology is used in the Lithium and Factor series.

Chaque grande idée est suivie d'une meilleure. Stealth 2.0 est l'évolution de la technologie Stealth avec un nouveau niveau de prestations et de finitions.

Le dessin industriel se dynamise en apportant plus de fluidité et de vitesse à chacun des tubes pour obtenir un poids visuellement plus léger et un attrait esthétique plus important. Les facettes plates et les arrêtes marquées, caractéristiques de la conception Stealth originale, se vrillent sur elles même en tournant à 90° afin d'augmenter la rigidité en torsion de toute la structure.

Cette évolution utilise le savoir faire obtenu avec les tubes Stealth pour optimiser les processus de construction et abaisser le poids sans sacrifier la résistance. Stealth 2.0 utilise un alliage d'aluminium exclusif de la série 6000 afin de réduire au maximum les épaisseurs variables et d'atteindre un poids record.

La technologie Stealth 2.0 est présente sur les séries Lithium et Factor.

Auf jede große Idee folgt eine noch bessere. Stealth 2.0 stellt die Entwicklung der Stealth-Technologie auf ein neues Leistungs- und Endverarbeitungs niveau.

Das Industriedesign gestaltet jedes einzelne der Rohre fließender und schneller, das Gewicht ist geringer bei attraktiverer Ästhetik. Die charakteristischen glatten Flächen und lebendigen Kanten des Originaldesigns Stealth drehen sich um 90° und verstärken die Torsionssteifigkeit der gesamten Struktur.

Diese Entwicklung nutzt alle Erkenntnisse des Stealth-Rahmens, um die Konstruktionsverfahren zu optimieren und das Gewicht zu reduzieren, ohne dabei die Steifigkeit zu vernachlässigen. Stealth 2.0 verwendet eine exklusive Aluminiumlegierung der Serie 6000, um die Wandstärken maximal zu reduzieren und damit ein authentisches Rekordgewicht zu erreichen.

Die Serien Lithium und Factor haben die Stealth 2.0 Technologie.

- _Fox 32 Talas CTD Fit Kashima 140mm 15QR fork
- _Fox Float CTD LV BV Kashima rear shock
- _Easton EA70 XCT 12x142mm wheelset
- _CrankBrothers Kronolog seatpost
- _Frame available

The Forward Geometry is compatible for all kinds of bikes and riders. So proves the Factor XR with its 120mm rear travel and a 400g lighter weighing frame compared to last year thanks to Stealth 2.0 tubing.

La Fordward Geometry est apte à tous les types de vélos et de pilotes comme le démontre ce Factor XR avec ses 120mm de débattement arrière. De plus ce cadre est 400g plus léger que le précédent grâce aux tubes Stealth 2.0.

Die Forward Geometry eignet sich für alle Arten von Bikes und Rider, wie es dieses Factor XR mit seinem 120mm Federweg beweist. Durch den Stealth-2.0-Rahmen konnte das Gewicht im Vergleich zum Vorjahr um 400g reduziert werden.

All the XR models are meant for a more extreme use within every of its categories. Our philosophy behind this concept is:

- 20mm more travel on the fork than at the rear, always using the Foxy Talas.
- Maxle through axle (RockShox Maxle) and ISCG 05 ready frame.
- Telescopic seatpost – remote on handlebar.
- Wider tires than the ones of the standard categories.
- Different shock-tuning with lower compression compared to the ones of the standard categories.

TRACKER RR

- _Sram S1000 3x10 crankset

The Tracker are designed to deliver optimum performance thanks to their ZERO suspension system at an affordable price. With 120mm of travel in all models, there's no doubt that getting a first full suspension bike will be a whole lot easier now.

Les Tracker sont pensés pour garantir un fonctionnement optimal grâce au système de suspension ZERO tout en conservant un prix bas. Avec un débattement de 120mm sur toutes les versions ils sont la porte d'entrée au monde des tout suspendus.

Die Tracker punkten mit dem ZERO-Suspension-System und einem günstigen Preis. Ihr Design garantiert einen optimalen Lauf. Mit 120mm-Fahrwerken bei allen Modellen wird die Welt der vollgefederten Bikes jetzt leichter zugänglich.

Lithium is leading the full suspension bikes for XC use, Stealth 2.0 is here and brings with it Mondraker's new model Lithium with a frame weighing less than 2kg. This year all the models have faced an upgrade with the new Monarch XX shock with hydraulic remote lock-out.

Le Lithium est en tête des vélos tout-suspendus XC avec un cadre en dessous des 2kg grâce aux tubes en aluminium Stealth 2.0. Cette année les modèles sont améliorés par la monte des nouveaux Monarch XX avec le blocage au centre hydraulique.

Das neue vollgefederte Modell Lithium befindet sich unter den führenden XC-Bikes. Aufgrund der Stealth-2.0-Technologie konnte das Rahmengewicht auf unter 2kg gebracht werden. Dieses Jahr konnten alle Modelle dank des neuen Monarch XX Dämpfers mit hydraulischer Fernbedienung verbessert werden.

- _Sram X0 GripShift 2x10 shifters
- _Frame available

The new Podium Carbon 29er offers all the technological features of its little sister. The advantages of the bigger 29er wheels make more sense on the Podium Carbon thanks to the IST system providing a more optimized riding position.

Les nouveaux Podium Carbon 29er offrent toutes les avancées technologiques de ses petits frères. Les avantages des roues de 29er pouces ont plus de sens sur le Podium Carbon grâce au système IST qui offre une position de conduite optimale.

Die neuen Podium Carbon 29er bestechen durch die gleichen technischen Raffinessen wie ihre kleinen Schwestern. Die Vorteile eines 29-Zoll-Rads gewinnen beim Podium Carbon aufgrund des IST-Systems, durch das eine optimal angepasste Fahrposition erreicht wird, an Bedeutung.

IST INTEGRATED STEM TECHNOLOGY

Mondraker presents a new concept in integration that takes Cross Country bikes to a new level. The new Podium with an IST stem offers the latest in XC Racing geometry with a lower control post and a pedal position unique in its segment. Its integrated stem design combined with the frame structure makes the whole of the front of the bike more compact, thus achieving greater stiffness and steering precision superior to any other existing steering system.

The position of the stem, made entirely of Stealth Carbon, can be adjusted using an eccentric aluminium insert in the handlebar with a margin of 1 cm on both the X and Y axes. Different stem sizes are available offering lengths ranging from 80mm to 120mm. The IST stem is designed with a replaceable internal stopper system to prevent damage to the frame from the bars swinging round in a crash and ensure the longevity of the steering system.

Mondraker présente un nouveau concept d'intégration qui élève les vélos de Cross Country à un autre niveau. Le nouveau Podium avec sa potence intégrée IST offre la géométrie XC Racing la plus avancée du moment avec un poste de pilotage abaissé et une position d'attaque unique dans son segment. La conception de la potence intégrée et la structure du cadre rendent la partie avant plus compacte, elles apportent plus de rigidité et une précision de conduite supérieure à tous les systèmes de direction connus.

La potence, réalisée 100% Stealth Carbon, dispose d'un système d'excentrique sur la prise du cintre pour ajuster sa position avec 1cm de marge sur tous les axes, autant en vertical qu'en horizontal. Il existe aussi plusieurs longueurs disponibles qui offrent des longueurs de 80mm à 120mm. La potence IST est conçue avec un système interne de butée interchangeable qui évite les possibles dommages de la structure provoqués par une chute et assure la longévité du système de direction.

Mondraker stellt ein neues Integrationskonzept vor, das die XC-Bikes auf ein neues Niveau hebt. Das neue Podium mit IST-Vorbau bietet die neueste XC-Racing-Geometrie mit einer niedrigeren Lenkzentrale und einer einzigartigen Sitzposition. Sein integrierter Vorbau zusammen mit der Struktur des Rahmens machen die gesamte Front des Bikes kompakter, steifer und lenkpräziser im Vergleich zu bisher bekannten Systemen.

Der Vorbau aus 100%-Stealth-Carbon verfügt über ein Exzentrersystem am Lenker, so dass seine Position 1 cm vertikal oder horizontal eingestellt werden kann. Ferner sind Längen von 80 bis 120mm verfügbar. Der Vorbau IST hat ein internes austauschbares Anschlagssystem, das eventuelle Schäden der Struktur, verursacht durch einen Sturz, vermeidet und die Lebensdauer des Lenksystems gewährleistet.

Stealth Carbon is the most advanced carbon fibre development and optimization technology in the Mondraker range. This new technology brings all the experience gained in making aluminium frames to top of the range carbon fibre frames meeting the same innovation, quality, weight and strength requirements. The technology encompasses all processes of making the frame, from the inspiration and creation of the industrial design to the optimization of each of the high modulus carbon fibres that shape all areas.

Each part of the frame is designed to carry out a specific function with the lowest possible weight. This has involved working on the fibre types, features, number and arrangement of each one combined with a painstaking compaction process using different epoxy resins which ensure the strength and durability of Stealth Carbon frames with Mondraker's limited lifetime warranty.

The new Podium Carbon 29er is Mondraker's flagship model when it comes to Stealth technology. It is a fast and direct bike where pedalling is turned into pure forward motion with the stiffness and precision needed to win an XC World Cup race.

Stealth Carbon est la technologie la plus avancée en terme de développement et d'optimisation des fibres dans la gamme Mondraker. Cette nouvelle technologie transfère toute l'expérience accumulée dans la réalisation de structures en aluminium vers la fibre de carbone haut de gamme en respectant les mêmes impératifs d'innovation, de qualité, de poids et de résistance. Cette technologie réunit tous les processus de création du cadre, de l'inspiration à la réalisation du dessin industriel jusqu'à l'optimisation de chacune des fibres haut module qui donne forme à l'ensemble.

Chaque partie du châssis est conçue pour réaliser une fonction particulière avec le poids le plus bas possible, en travaillant sur le type de fibre, leurs caractéristiques, leur nombre et leurs dispositions, ainsi que sur le laborieux travail de compression avec plusieurs résines époxy nous assurons la résistance et la durabilité des cadres Stealth Carbon avec la garantie limitée à vie Mondraker.

Le nouveau Podium Carbon 29er est l'étendard de la technologie Stealth. Un vélo rapide et direct où chaque coup de pédale se transforme en avancée pure avec la rigidité et la précision nécessaires pour gagner une course de Coupe du Monde de XC.

Stealth Carbon ist die fortschrittlichste Technologie der Serie Mondraker in Entwicklung und Optimierung von Karbonfasern. Diese neue Technologie ist das Resultat der Erfahrungen bei der Realisierung von Aluminiumstrukturen. Sie fanden Anwendung bei der Bearbeitung von hochwertigsten Kohlenstofffasern. Dabei werden alle Voraussetzungen für Innovation, Qualität, Gewicht und Widerstand erfüllt. Bei der Entwicklung des Rahmens wurden all diese Technologien angewandt, von der Inspiration und dem Industriedesign-Konzept bis hin zur Optimierung jeder einzelnen hochwertigen Faser. Jedes mit Fasern hergestellte Teil des Rahmens zielt darauf ab, ein möglichst geringes Gewicht zu erreichen.

Gearbeitet wurde an den verschiedensten Fasersorten, an deren Charakteristika, an deren Zahl und Anordnung sowie am mühsamen Verfahren der Verdichtung mittels verschiedener Epoxidharze, die Widerstandsfähigkeit und Langlebigkeit der Stealth-Carbon-Rahmen gewährleisten, abgesichert durch die begrenzte lebenslange Mondraker-Garantie.

Das neue Podium Carbon 29er ist der klare Standard der Stealth-Technologie. Ein schnelles, direktes, präzises Bike, mit dem Du ein Weltcup-XC-Rennen gewinnen kannst.

The name Podium stands for "high performance" and the alloy version could not stay behind. Following the evolution of the Carbon version, it maintains its race geometry and is equipped with a good package of the latest components which makes this bike a real XC queen.

Le nom Podium est synonyme de hautes performances et le modèle en aluminium ne pouvait pas être en reste. Dans la lignée du modèle Podium Carbon il maintient la géométrie racing et avec des composants de dernière génération il fait lui aussi partie de l'élite du XC.

Der Nachname Podium steht für hohe Leistungen und das Modell mit Aluminiumrahmen sollte nicht im Schatten bleiben. Im Kielwasser der Bikes mit Karbonrahmen behält dieses Modell die Racing-Geometrie bei, wobei es aufgrund seiner Komponenten neuester Generation zur wahren Königin der XC-Bikes gekrönt wurde.

The Finalist's unbeatable value for money is now also in the Finalist 29er family. Geometry as similar as possible to their smaller 26" relatives mean that Finalist 29er bikes handle very easily. A new version, namely the Finalist Pro SL, has been introduced this season to provide even more options within this line.

L'imbattable rapport équipement prix de la gamme Finalist est transféré vers la famille Finalist 29er. Une géométrie la plus similaire possible à celle de leurs homologues en 26" fait des Finalist 29er des vélos maniabiles. De plus, cette année la gamme est élargie avec le Finalist Pro SL pour offrir un choix de possibilité plus large.

Das unschlagbare Preis-Leistungs-Verhältnis der Finalist Serie gilt auch für die Finalist 29er. Die Geometrie sollte der ihrer kleinen 26"-Schwestern möglichst ähneln, so dass auch die Finalist 29er besonders lenkbar und handlich sind. Dieses Jahr wird die Serie durch das Finalist Pro SL ergänzt, um die Auswahl zu erweitern.

Mondraker has always been famous for bringing innovation to the market so we couldn't make just another XC bike; it had to be different, functional, lightweight and attractive. These were the instructions given to our engineering and design team during the development process of this model. This year we have gone a step further by using other components making it 300gr lighter than last year.

Mondraker se caractérise par son offre différente, c'est pour cela que nous ne pouvions pas faire un vélo de XC de plus, il devait être différent, fonctionnel, léger et attrayant. Avec ces directrices l'équipe de recherche et développement c'est mise en marche pour parvenir longtemps après au résultat que présente le nouveau Podium Carbone avec la technologie Stealth Carbon. D'autre part cette année nous montons des composants qui les rendent jusqu'à 300g plus légers.

Mondraker steht für Innovation und strebt danach, dem Markt noch nie Dagewesenes zu bieten. Folglich musste etwas Neues her, anders, zweckmäßig, leicht und attraktiv. Diese Maxime wurden von unserem Technik- und Design-Team nach einer langen Entwicklungszeit endlich durch das neue Podium Carbon mit der Stealth-Carbon-Technologie verwirklicht. Zudem haben wir diese Saison einige Komponenten ausgetauscht, und so am Bike jetzt 300g eingespарт.

VENTURA PRO

- _Mondraker Custolite triple butted frame
- _Suntour XCM Remote lock out 100mm fork
- _Tektro HDC300 hydraulic 160mm disc brakes
- _Sram 3x10 drivetrain
- _FSA Gamma Drive 2pcs crankset

The new triple butted frames take the Ventura family to a higher level that is unique in its category. There have been numerous improvements for the Ventura in terms of components and the Ventura Pro offers the advantages of a 30 speed transmission at an extraordinary price.

Le nouveau cadre triple butted de la famille Ventura l'élève à un niveau supérieur unique dans sa catégorie. Ces modèles reçoivent de nombreuses améliorations en ce qui concerne les équipements, notamment le modèle Ventura Pro offre des prestations en 30 vitesses à un prix vraiment spectaculaire.

Der neue dreifach konifizierte Rahmen der Ventura Serie macht sie einzigartig in ihrer Kategorie. Hinsichtlich der Komponenten sind die Ventura-Modelle stark verbessert worden. Hervorzuheben ist das Modell Ventura Pro, das mit 30 Gängen zu einem spektakulären Preis kommt.

The Concept family is much more attractive this year due to the new colours and graphics together with the shapes of the frame and personalized forks. Concept means you've got some fun adventures awaiting which you can then share with your friends.

La famille Concept est une fois de plus très séduisante grâce à sa nouvelle cosmétique, à la forme de cadre et aux fourches personnalisées. Avec les Concept de belles et amusantes aventures à partager avec la famille et les amis t'attendent.

Die Concept Serie ist dieses Jahr wesentlich attraktiver dank der neuen Farben und Grafiken, der Gestaltung des Rahmens und den personalisierten Federgabeln. Mit dem neuen Concept wirst Du Spaß und Abenteuer erleben und mit Deinen Freunden später teilen können.

Ventura Go / Tracker Go

VENTURA GO

- _Mondraker Custolite triple butted alloy frame
- _Suntour XCT lock out 100mm fork
- _Tektro HDC300 hydraulic 160mm disc brakes
- _Shimano Acera RD & Shifters
- _Mondraker XC 31.8mm components

All the characteristics of the Ventura range offered to our female riders. An adapted geometry for female posture, a fork with softer compression, a shorter stem, a smaller handlebar, foam grips and a special specific saddle make this bike very comfortable during the ride.

Toutes les caractéristiques de la gamme Ventura mises à disposition des femmes. Une géométrie adaptée à leur morphologie, avec une fourche plus souple, une potence plus courte, un cintre plus étroit, des grips en mousse et une selle spécifique, autant de changements synonymes de confort lors des randonnées.

Alle Merkmale des Ventura Modells werden übernommen und sind für Fahrerinnen ab sofort verfügbar. An die weibliche Anatomie angepasste Geometrie, weichere Federgabel, kürzerer Vorbau, schmaler Lenker, Schaumstoffgriffe und komfortabler Damensattel sollten den Fahrerinnen die Tour angenehm gestalten.

TRACKER GO

- _Mondraker SAT Square Alloy Technology frame
- _Mondraker Zero Suspension System, 120mm
- _RockShox XC32 TK Coil 120mm fork
- _X-Fusion E1RL lock out rear shock
- _Avid Elixir 1 180/160mm brakes

Now you too can enjoy the Zero suspension system on our Tracker GO model, with slight changes in its components to fit the female form. 120mm travel that will undoubtedly make this All Mountain bike into your inseparable friend.

Pour elle il sera maintenant possible de profiter du système de suspension Zero avec le modèle Tracker Go, de légers changements dans les composants pour l'adapter à la morphologie féminine, ses 120mm de débattement feront de ce All Mountain un ami inséparable.

Jetzt können auch die Mädels vom ZERO-Hinterbausystem profitieren. Mit leicht abgeänderten, der Anatomie der Frau angepassten Komponenten und 120mm Federweg wird dieses Modell zu Deiner besten Freundin, von der Du Dich nie wieder trennen wirst.

Dualen / Quarter I / Quarter II / Play 1 / Play 2

DIRT / STREET

DUALEN

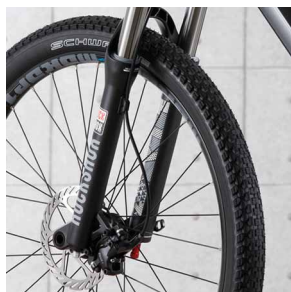

- _Mondraker Stealth Alloy Dirt Street
- _RockShox Argyle R coil 20mm 100mm fork
- _Avid Elixir 1 160mm fork
- _Truvativ Ruktion 1.0 36T crankset + E.13LS1 chainguide
- _Onoff Morph custom components

Dualen is back this year with a complete makeover featuring a new Stealth tube frame that can withstand the worst you can throw at it. Inside this amazingly cool look lies a genuine precision machine that enables you to do any trick with complete confidence.

Le Dualen revient cette année totalement rénové, le nouveau cadre avec ses tubes Stealth est à l'épreuve du pire des traitements. Sous cette esthétique si réussie se trouve une machine précise qui te permettra d'engager tous les tricks avec une fiabilité absolue.

Das Dualen wurde dieses Jahr komplett neu ausgelegt. Auch rauer Umgang ist für diesen neuen Stealth-Rahmen kein Problem. Hinter dem coolen Design versteckt sich eine wirkliche Präzisionsmaschine, auf die du auch beim Meistern härtester Outdoor-Abenteuer absolut vertrauen kannst.

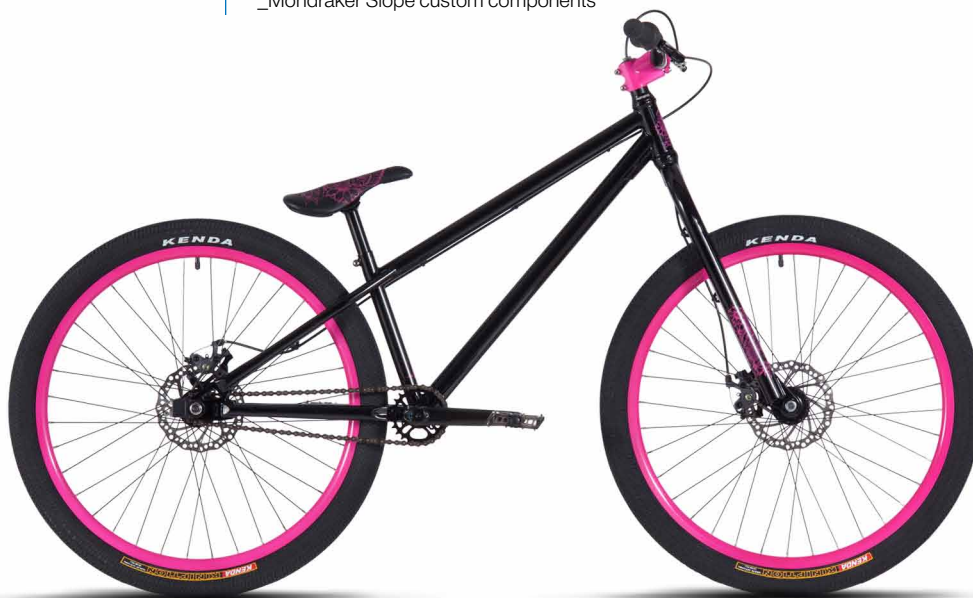

QUARTER I

- _Mondraker 4130 CrMo Slim tubing
- _Suntour Duro DJ D 100mm fork
- _Tektro HD300 hydraulic 160mm disc brakes
- _SS CrMo 3-pcs 25t Alloy crankset
- _Mondraker Slope custom components

QUARTER II

- _Mondraker 4130 CrMo Slim tubing
- _Mondraker Chromoly Freestyle disc
- _Tektro Novela 160mm disc brakes
- _SS CrMo 3-pcs 25t crankset
- _Mondraker Slope custom components

Pure Dirt is represented by our Quarter with a 4130 Chromoly frame, this year with an amazing look that no one can ignore.

Le Dirt pur est incarné par les Quarter avec cette année un cadre en Chromoly 4130 et une esthétique qui ne laissera personne indifférent.

Die Quarter mit Chromoly 4130-Rahmen halten höchste Beanspruchung im harten Dirt-Einsatz stand und überzeugen dieses Jahr durch eine Ästhetik, die niemanden gleichgültig lässt.

PLAY 1

- _Mondraker Alloy 6061 Square street
- _Suntour Duro DJ D 100mm fork
- _Tektro HD300 hydraulic 160mm disc brakes
- _Truvativ Ruktion 1.0 34T crankset
- _Onoff Morph components

PLAY 2

- _Mondraker Alloy 6061 Square street frame
- _RST Dirt T 100mm fork
- _Tektro Novela 160mm disc brakes
- _Suntour XCT 42/32/22T crankset
- _Kenda K-Rad 2.30 tires

This year we present two models in the Play category with exciting new colors to attract the younger riders.

Deux modèles cette année dans la famille Play, de nouvelles couleurs et un ton décontracté pour la catégorie la plus jeune.

Dieses Jahr erwartet Dich die Play Serie mit neuen Farben, die frischen Wind und ungezwungene Ästhetik in die jüngste Kategorie bringen.

BMX

Photo: David Ponce - Location: Universidad de Elche. Alicante. Spain - Rider: Kevin Sánchez

Duel Pro Team / 540° / 360° / 180°

DUEL PRO TEAM

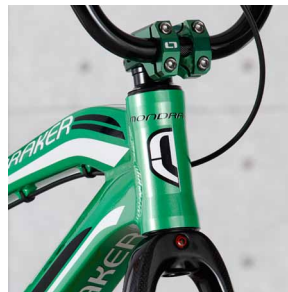

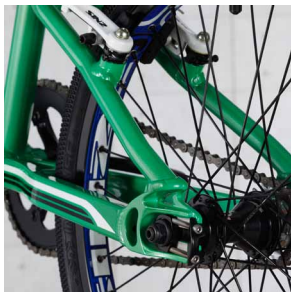

- _Mondraker BMX Stealth Side Alloy Structure frame
- _Sinz SSF-01 Carbon fork
- _Sinz Pro 20" wheelset
- _Mondraker-ITS Micronobby 20x2.125F / 1.75R tires
- _Available in two sizes, Pro and Pro XL
- _Frame available in 4 sizes

The Duel Pro Team frame with Stealth tubes noticeably improves the bike's performance on a BMX circuit. An ultra-lightweight frame together with great stiffness provided by the oversized square tubes delivers peerless speed of response and precision.

Le cadre Duel Pro Team a un rendement sensiblement optimisé sur un circuit de Race avec les tubes Stealth. La légèreté extrême du cadre liée à une grande rigidité apportée par les tubes surdimensionnés carrés donne une vivacité et une précision imbattable au vélo.

Der neue Duel Pro Team-Rahmen mit Stealth-Rohrsatz optimiert spürbar die Leistung des Bikes auf einer BMX-Strecke. Der außergewöhnlich leichte Rahmen zusammen mit der enormen Steifigkeit der überdimensionalen viereckigen Rohre lassen schnell reagieren und sind unschlagbar präzise.

540°

- _Mondraker Slim Cromoly / Hi-Ten20" frame
- _Mondraker Hi-Ten Freestyle fork
- _Integrated ahead-set
- _SS Chromoly 3pcs 5mm alloy 25t ring crankset
- _Mondraker BMX pivotal saddle

Some slight changes on the geometry combined with a higher and wider handlebar give this BMX range a more Professional personality.

De légères modifications apportées à la géométrie du cadre ainsi qu'un cintre plus haut et plus large rendent toute la famille BMX plus Pro.

Neuer Rahmen mit kürzeren Kettenstreben, kürzerer Sattelstütze und der neuen verstellbaren Federgabel verleihen der gesamten BMX-Serie einen noch professionelleren Charakter.

360°
