

ALL-IN BLUE

00

INTRO

On our 15th anniversary at Mondraker we are returning to the fray by presenting our new 2016 bikes collection as one of the most innovative international brands and raising the technological bar in each of our new MTB creations.

The colour of the new 2016 designs is one of the main themes in the entire collection, which overall have an unprecedented visual appeal. The extraordinary Dune Carbon completes the circle between our maximum performance Carbon Stealth full suspension models. As with Summum Carbon and Foxy Carbon in their respective categories, Dune Carbon has become the new benchmark in Enduro racing bikes and inherits the best features and qualities of both models, the only Enduro racing model on the market with adjustable geometry.

The 27'5"+ models are also in a unique leadership position among our innovations. We are presenting up to 8 new 27'5"+ models in 2016, 4 of which belong to a new collection of e-MTB bikes where Mondraker is building a solid partnership with leading German manufacturer Bosch. The powerful e-Panzer rounds off our electric range while kids will be able to enjoy the 20" and 24" 'mini-Panzer'.

2016 will see Mondraker's greatest commitment to technology in recent years with the creation of our first collection of e-MTB bikes, the innovative models with 27'5"+ wheels and Dune Carbon, which is set to mark a historic milestone and a before and after in Enduro racing bikes.

Pour notre 15e anniversaire, chez Mondraker nous revenons à la charge en présentant notre nouvelle collection de vélos 2016, consolidée comme l'une des marques les plus innovantes dans le cadre international, nous avons relevé le niveau technologique de chacune de nos nouvelles créations VTT.

Les coloris de nos nouveaux designs 2016 sont l'une des notes prépondérantes de la collection qui est caractérisée dans son ensemble par un attrait visuel sans précédents. L'extraordinaire Dune Carbon complète la gamme parmi nos modèles à double suspension Stealth Carbon avec des prestations optimales. Comme pour le Summum Carbon et le Foxy Carbon dans leurs catégories respectives, le Dune Carbon est devenu à lui seul une nouvelle référence parmi les vélos d'Enduro de course. Il hérite des meilleures caractéristiques et des qualités de ces deux modèles en étant le seul modèle Enduro de compétition du marché avec une géométrie réglable.

Les modèles 27'5"+ occupent également une place privilégiée et ont un rôle important parmi nos nouveautés. En 2016, nous présentons jusqu'à 8 nouveaux modèles 27'5"+ 4 d'entre eux font partie d'une nouvelle collection de vélos e-VTT, segment dans lequel Mondraker fait son entrée d'un pas ferme en partenariat avec le prestigieux fabricant allemand Bosch. Le puissant e-Panzer complète l'offre électrique, tandis que les plus petits ne seront pas en reste avec les "mini-Panzer" en 20" et 24".

2016 sera pour Mondraker le plus grand pari technologique des dernières années avec la création de la première collection de vélos e-VTT, les innovants modèles en roues de 27'5"+ et le Dune Carbon, ces modèles marqueront un tournant historique et le Dune Carbon sera un point d'inflexion parmi les vélos d'Enduro de compétition.

Zum 15 Geburtstag zeigt sich Mondraker mit der neuen 2016 Bike-Kollektion als eine der innovativsten Marken weltweit und legt dabei die Messlatte für technologische Entwicklung in allen seinen MTB Kategorien sehr hoch.

Die Farben und Designs spielen in unserer neuen 2016er Kollektion eine wichtige Rolle. Sie geben allen Modellen einen völlig neuen Look. Das außergewöhnliche Dune Carbon ergänzt unsere Familie der Top-Performance Fullsuspension-Bikes mit der aufwendigsten Stealth Carbon Konstruktion., die wir je gebaut haben. Genau wie auch das Summum Carbon und das Foxy Carbon in seinen Kategorien, gilt das neue Dune Carbon als Benchmark in seiner Klasse, den Enduro-Racebikes. Es hat die herausragenden Charakteristika und Eigenschaften von beiden Modellen übernommen und ist das einzige Race-Bike auf dem Markt, bei dem sich die Geometrie einstellen lässt.

Auch die 27'5"+ Modelle stehen 2016 im Mittelpunkt unserer Neuheiten. Wir zeigen 8 neue 27'5"+ Modelle, wovon 4 zur neuen e-MTB-Kollektion gehören, mit der Mondraker eine feste Partnerschaft mit dem renommierten und führenden Hersteller Bosch startet. Das starke e-Panzer Bike komplettiert das Angebot der E-Bikes. Auch die Kleinen werden mit den mini-Panzern in 20" und 24" voll auf ihre Kosten kommen.

2016 reagiert Mondraker mit 3 Innovationen auf die größten technischen Herausforderungen der letzten Jahre: Mit dem Entwurf der ersten e-MTB Kollektion, den neuen 27'5"+ Bikes und dem Dune Carbon, das die Geschichte der Enduro-Racebikes in ein „davor“ und „danach“ unterteilt.

FORWARD GEOMETRY

Technology

In 2016 our geometric concept, which makes each Mondraker model into a bike delivering unique performance superior to the rest, is now in its fourth season since its launch.

In 2016 the Forward Geometry models will have FG30 stems as standard and FG20-30 in downhill Summum bikes. We are continuing to supply the FG10 and FG20 versions optionally for riders more used to Forward and for more extreme use.

FORWARD GEOMETRY ADVANTAGES

• Safety on steep downhill areas

The front axle is more advanced compared to traditional geometry which increases stability and makes it impossible to go over the handlebars on steep sections. It also feels more secure and confident due to the slacker angle perception.

• Confidence at high speed

The longer wheelbase makes the bike much more stable over any terrain.

• Direct steering

The short stems only 10mm, 20mm or 30mm in length provide a greater front wheel angle with less handlebar movement, which improves steering precision and makes the bike very reactive.

• Uphill precision

The front wheel stays in contact with the ground avoiding wheelies due the longer front-centre length (distance from the bottom bracket to the front wheel axle).

• Stability in technical and rough sections

FG provides a new weight balance between front and rear wheel making it possible to load the front wheel a lot more than with classic geometry. This advantage changes your handling by giving better grip in cornering and significantly improving control.

Notre concept géométrique qui fait de chaque modèle Mondraker un vélo avec un comportement unique et supérieur aux autres, il fête en 2016 sa quatrième saison depuis son lancement.

En 2016, les modèles Forward Geometry sont équipés de potences FG30 en série et FG20-30 pour les Summum de descente. Nous proposons toujours les versions FG10 et FG20 en option pour les usagers les plus habitués à la Forward et pour une utilisation plus extrême.

LES AVANTAGES DE LA FORWARD GEOMETRY

• Sécurité dans les pentes raides

L'axe avant est plus avancé par rapport à une géométrie traditionnelle ce qui augmente la stabilité et rend presque impossible de passer par dessus le guidon dans les pentes très inclinées, elle offre davantage de sécurité et de confiance grâce à la perception d'un angle de direction plus ouvert.

• Confiance à grande vitesse

L'empattement plus important rend le vélo beaucoup plus stable sur tous les terrains.

• Direction directe

Les potences si courtes de seulement 10mm, 20mm ou 30mm de long permettent avec un moindre mouvement du cintre d'obtenir le même angle de rotation de la roue avant, ce qui améliore la précision de la direction et rend le vélo très réactif.

• Précision en montée

La roue avant garde toujours le contact avec le sol évitant les cabrages grâce à la longueur du front-center (la distance entre l'axe de pédalier et l'axe de roue avant).

• Stabilité dans les zones techniques et difficiles

Le FG établit un nouvel équilibre des masses entre la roue avant et la roue arrière en permettant de charger beaucoup plus la roue avant qu'avec une géométrie classique. Cet avantage change votre style de conduite en offrant une meilleure prise des virages tout en améliorant considérablement le contrôle.

Unser Geometrie-Konzept, das aus allen Mondraker Modellen einzigartige und überragende Bikes macht, geht 2016 in sein 4. Serienjahr nach der Entwicklungsphase.

2016 wurde auf den Forward Geometry Bikes serienmäßig der FG30 Vorbau verbaut, beim Summum DH der FG20-30. Wir bieten auch weiterhin optional die Versionen FG10 und FG20 für all diejenigen an, die bereits sehr vertraut mit der Forward Geomtry sind, oder für den extremeren Einsatz.

VORTEILE DER FORWARD GEOMETRY

• Sicherheit bei der Abfahrt und im steilen Gelände

Die Vorderradachse ist im Vergleich zur traditionellen Geometrie weiter nach vorn gelegt. Das erhöht die Fahrstabilität und verhindert, dass man im steilen Gelände vorn zu weit über den Lenker kommt. Insgesamt bietet FG durch die Veränderung des Schwerpunktes mehr Sicherheit und Laufruhe.

• Vertrauen bei hoher Geschwindigkeit

Durch den maximalen Radstand erhöht sich die Laufruhe in jedem Gelände.

• Direktes Lenkverhalten

Die kurzen Vorbauten von nur 10mm, 20mm, 30mm Länge erlauben eine sehr direkte Lenkpräzision, so dass das Rad leichter reagiert: schon ein geringes Einschlagen des Lenkers bewirkt einen größeren Lenkwinkel beim Vorderrad.

• Präzision im Anstieg

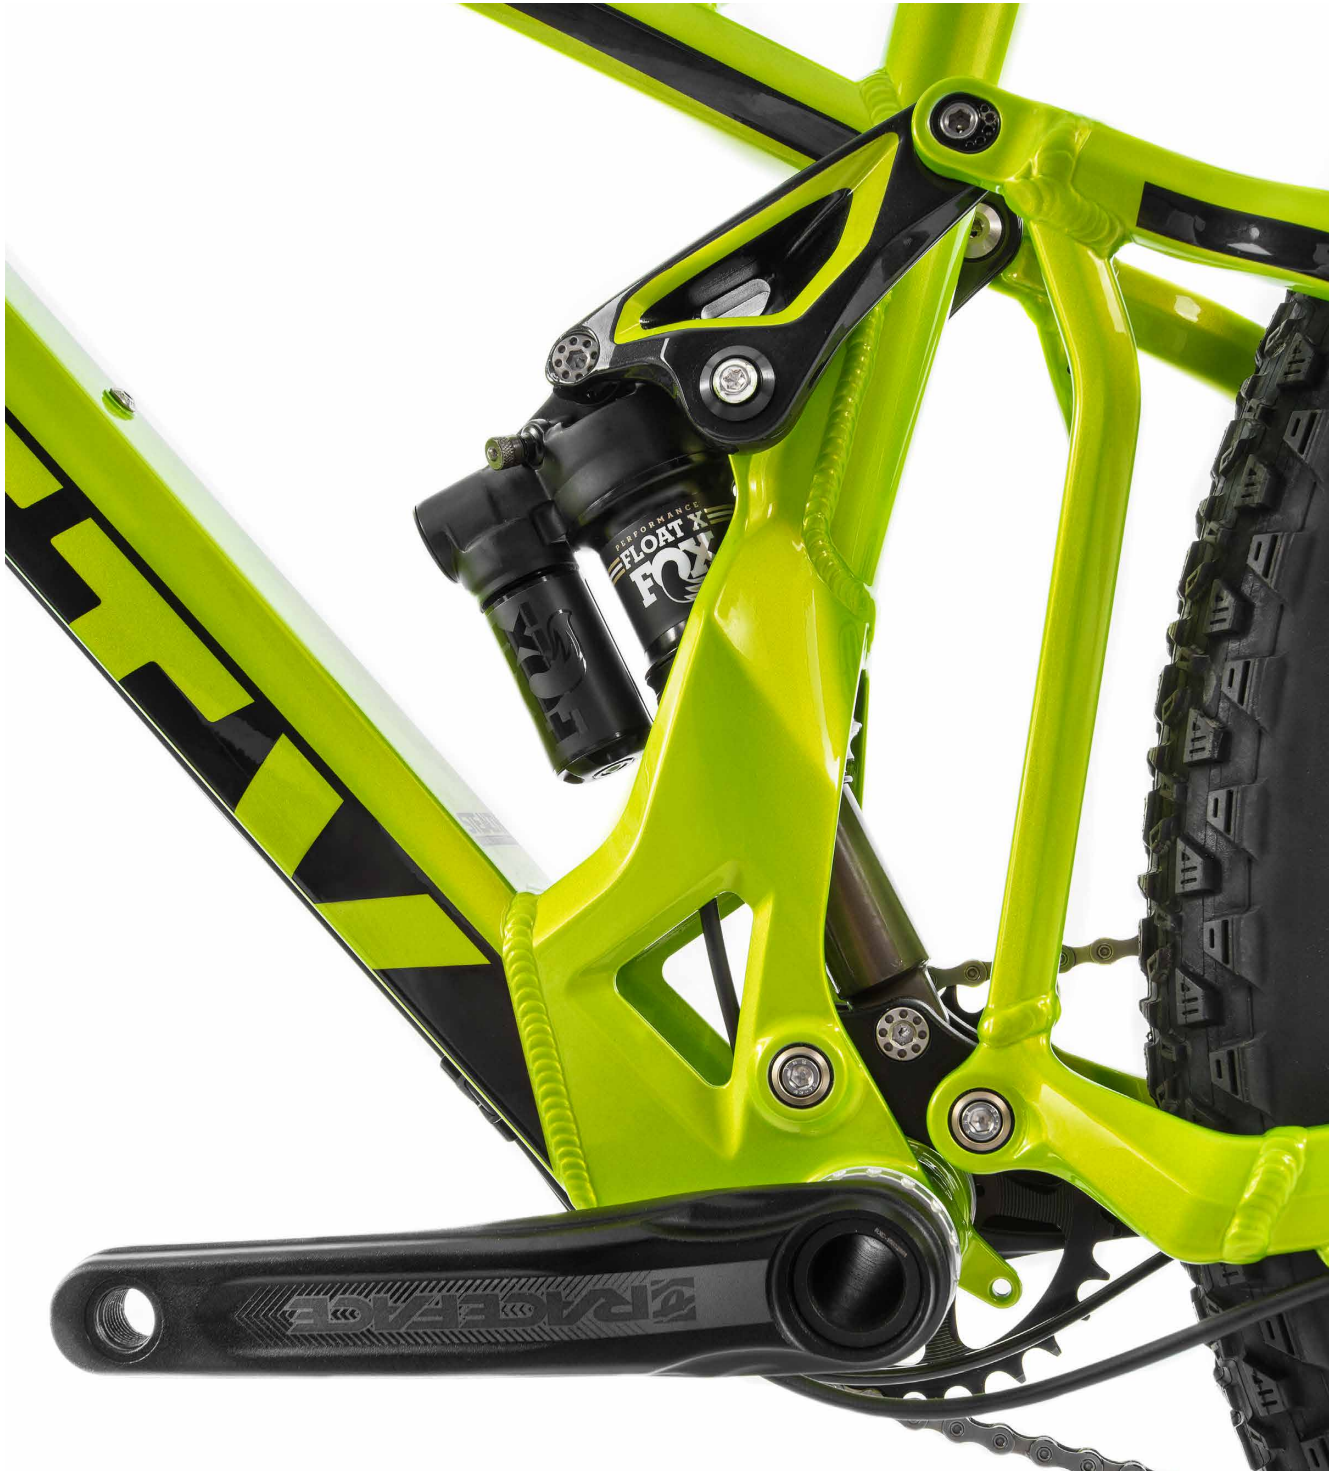

Das Vorderrad bleibt im sicheren Bodenkontakt ohne abzuheben, denn durch den verlängerten Radstand und dem Fahrerswerpunkt ruht mehr Gewicht auf dem Vorderrad.

• Stabilität in technischen und schwierigen Zonen

FG stellt ein neues Gleichgewicht zwischen dem Vorder- und Hinterrad her: das Vorderrad wird hier sehr viel stärker belastet als bei der klassischen Geometrie. Das ermöglicht einen optimalen Halt in den Kurven und verbessert insgesamt die Kontrolle über das Bike.

ZERO SUSPENSION SYSTEM

Technology

Zero is the name of Mondraker's exclusive patented suspension system. From Summum 27'5" to Factor 27'5" and 24", all Mondraker's full suspension models share the basis of the Zero suspension system, where travel, pedalling efficiency and overall performance are fully optimised for each of the categories.

• **Zero power loss**

The system neutralises any bob when pedalling. The force applied to the pedals translates into immediate forward motion without extra compression or extension of the rear suspension.

• **Zero pedal kickback**

The stretching on the chain is insignificant throughout the suspension travel, so pedalling is as effective and efficient as possible.

• **Zero brake jack**

Using the rear brake does not alter the operation of the suspension system. The braking forces are isolated to maintain the effectiveness of the rear suspension without compression or extension.

• **Zero bumps**

The main characteristic of the system is its excellent absorption capacity at the same time as it provides high pedalling efficiency. The optimised trajectory of the rear axle and its linear operation create a rear suspension that assures very effective impact absorption by the rear wheel.

Zero c'est le nom du système de suspension exclusif, breveté par Mondraker. Du Summum 27'5" au Factor 27'5" en passant par le 24", tous les modèles tout-suspendus de Mondraker partagent les bases du système de suspension Zero où le débattement, l'efficacité de pédalage et le rendement global, sont complètement optimisés pour chaque discipline concrète.

• **Zero perte d'énergie**

Le système neutralise tout éventuel va-et-vient provoqué par le pédalage. La force appliquée sur les pédales se traduit en avancée immédiate, sans transfert de mouvement de compression ou d'extension vers l'amortisseur.

• **Zero interférences avec le pédalage**

L'étirement de la chaîne est imperceptible sur tout le débattement, aucun étirement ou décroissance n'affecte l'obtention d'un pédalage rond.

• **Zero interaction au freinage**

La suspension arrière maintient son fonctionnement inaltérable lorsque le frein arrière est actionné. Les forces générées au freinage demeurent parfaitement isolées en maintenant l'efficacité de la suspension arrière indépendante, sans compression ni extension.

• **Zero trou**

La caractéristique la plus remarquable du système est son excellente capacité d'absorption unie à chaque instant à son efficacité de pédalage. La trajectoire parfaitement étudiée de l'axe de roue arrière et son caractère linéaire créent une suspension qui fait disparaître tous types d'impacts sous la roue.

Zero ist das von Mondraker entwickelte und patentierte Federungssystem. Vom Summum bis zum Factor bieten alle Mondraker Fully-Modelle das Zero Suspension-System. Dabei sind Tritt-Effizienz und Dämpfung insgesamt für alle Disziplinen optimiert.

• **Zero – Null Energieverlust**

Das System neutralisiert alle möglichen Rückschlag-Bewegungen während des Pedalierens. Die Kraft, die auf das Pedal gebracht wird, überträgt sich direkt in den Vortrieb, ohne ein Ein- oder Ausfedern der Federung zu provozieren.

• **Zero – Null Kickback aufs Pedal**

Die Kettenspannung ist unabhängig von der gesamten Federbewegung, dadurch wird die Pedalbewegung effektiv in Vortrieb umgewandelt.

• **Zero – Null Interferenz beim Bremsen**

Die Hinterrad-Federung funktioniert komplett unabhängig von der hinteren Bremsaktion. Die Kräfte wirken also isoliert nur auf die Bremse, ohne dabei die Federung zum Ein- oder Ausfedern zu aktivieren.

• **Zero – Null Schlaglöcher**

Die Stärken des Systems sind seine überragenden Dämpfungseigenschaften in Verbindung mit seiner perfekten Tritt-Effizienz. Durch die besondere Aufhängung und das feine Ansprechverhalten lässt die Federung alle Schläge verschwinden, die auf das Hinterrad treffen.

STEALTH SIDE STRUCTURE

Stealth is the most advanced industrial design and structure optimisation technology used in the Mondraker range. Stealth encompasses all processes in the creation of the frame, from the industrial design to the specific production of each of its tubes with the calculation of the most precise details that optimise each part for a specific function. Each tube and part is carefully designed to carry out a specific function while striving to achieve the lowest possible weight.

Aluminium Summum, Dune, Foxy, Crafty and Vantage are fine examples of Stealth technology.

Stealth technology version **2.0** represents the evolution of the concept to a new level of features and finishes. The industrial design is more elaborate and more stylised with a greater visual appeal. The characteristic flat faces and sharp edges of the original Stealth design turn through 90 degrees and thus increase the torsional rigidity of the entire frame.

Stealth 2.0 uses an exclusive aluminium alloy in the 6066 series to reduce internal thicknesses and butting to achieve a final weight that's a real record. Stealth 2.0 technology is to be found in the Factor 27'5", Factor 24" and Panzer.

Stealth Carbon is the most advanced carbon fibre development and optimisation technology in the Mondraker range. This constantly developing technology brings all the experience gained in making aluminium frames to top of the range carbon fibre to meet the same innovation, maximum quality, minimum weight and strength requirements.

Each part of the frame is designed to carry out a specific function with the lowest possible weight and careful positioning in the application and arrangement of carbon fibres exclusive to each specific model and size. The result is a frame with the best strength / structural rigidity / lightness ratio, exceptional reliability and a very attractive unique 100% Mondraker look.

Summum Carbon, Dune Carbon, Foxy Carbon, Podium Carbon and Chrono Carbon are the Stealth Carbon technology flagships.

Stealth représente le dessin industriel le plus novateur et l'optimisation des structures la plus poussée dans la gamme Mondraker. Stealth regroupe tous les processus de création de cadre, depuis l'inspiration et la conception du dessin industriel jusqu'au calcul des éléments finis qui assurent et optimisent chacune des parties pour une fonction spécifique en passant par la création exclusive de chaque tube tout en ayant le poids le plus bas possible.

Le Summum en aluminium, Dune, Foxy, Crafty ou Vantage sont des déclinaisons claires de la technologie Stealth.

La **version 2.0** de la technologie **Stealth** est l'évolution du concept avec un nouveau niveau de prestations et de finitions. Le dessin industriel se dynamise en apportant plus de fluidité et de vitesse à chacun des tubes pour obtenir un poids visuellement plus léger et un attrait esthétique plus important. Les facettes plates et les arrêtes marquées, caractéristiques de la conception Stealth originale, se vrillent sur elles même en tournant à 90° afin d'augmenter la rigidité en torsion de toute la structure.

Stealth 2.0 utilise un alliage d'aluminium exclusif de la série 6066 afin de réduire au maximum les épaisseurs variables et d'atteindre un poids record. Nous pouvons trouver la technologie Stealth 2.0 dans les Factor 27'5", Factor 24" et Panzer.

Stealth Carbon est la technologie la plus avancée en terme de développement et d'optimisation des fibres de carbone dans la gamme Mondraker. Cette nouvelle technologie en constante évolution transfère toute l'expérience accumulée dans la réalisation de structures en aluminium vers la fibre de carbone haut de gamme en respectant les mêmes impératifs d'innovation, de qualité, de poids et de résistance.

Chaque partie du cadre est conçue pour réaliser une fonction particulière au poids le plus bas possible avec le positionnement étudié dans l'application et la disposition des fibres de carbone exclusive pour chaque modèle. Le résultat est un cadre avec le meilleur rapport résistance / rigidité structurelle / légèreté, une fiabilité exceptionnelle et un look unique 100% Mondraker, très attrayant.

Le Summum Carbon, le Dune Carbon, le Foxy Carbon, le Podium Carbon et le Chrono Carbon sont les clairs fleurons de la technologie Stealth Carbon.

Stealth steht bei Mondraker für die fortschrittlichste Technologie im Bereich Design und Strukturoptimierung von Aluminium. Stealth umfasst die Prozesse des Rahmenentwurfes, vom Industrie-Design über das Bearbeiten aller Rohre bis zur genauen Berechnung der Anbauteile. Alle diese Prozesse garantieren, dass alle Teile ihre spezifische Funktion optimal erfüllen können. Jedes Rohr und jedes Anbauteil ist so designed, dass es bei geringst möglichem Gewicht seine ganz bestimmte Funktion erfüllt.

Das Alu-Summum, genauso wie das Dune, Foxy, Crafty oder Vantage sind Modelle mit Stealth Technologie.

Die **Version 2.0** der **Stealth** Technologie steht für die Weiterentwicklung des Konzeptes auf ein Niveau der maximalen Leistungsfähigkeit. Das Design ist perfekt ausbalanciert und es überzeugt durch einen großartigen optischen Auftritt. Charakteristisch sind die planen Flächen und die scharfen Kanten des Original Stealth Designs über 90 Grad, so konnte nochmals die Seiten-StEIFigkeit der gesamten Struktur optimiert werden.

Stealth 2.0 verwendet eine Aluminium Legierung der 6066er Serie, die sowohl Rahmenstärke als auch Konifizierung auf ein Minimum reduzieren, so dass ein Rekordgewicht erzielt werden konnte. Die Stealth 2.0 Technologie findet sich im Factor 27'5", im Factor 24" und im Panzer wieder.

Stealth Carbon steht für das fortschrittlichste Fertigungsverfahren von Karbonfasern in der Mondraker-Produktlinie. Hier spiegelt sich die gesamte Erfahrung der langjährigen Arbeit mit Alu- und Karbon-Strukturen wieder. Innovation, maximale Qualität, minimales Gewicht und Robustheit stehen dabei immer im Vordergrund.

Jedes Detail des Rahmens wurde so konstruiert, dass es eine spezielle Funktion erfüllt, Vorgabe dabei war geringst mögliches Gewicht, sowie die optimale Positionierung und Verarbeitung der einzelnen Karbon-Lagen spezifisch für jedes Modell und jede konkrete Größe. Das Resultat ist ein Rahmen mit dem besten Verhältnis aus maximaler Haltbarkeit, Seitensteifigkeit und geringem Gewicht, dazu kommen außergewöhnliche Zuverlässigkeit und der einzigartige und attraktive 100% Mondraker Look.

Summum Carbon, Dune Carbon, Foxy Carbon, Podium Carbon und Chrono Carbon repräsentieren diese Stealth Carbon Technologie.

IST / INTEGRATED STEM TECH

In combination with our XC Carbon Podium racing bikes, our IST technology offers a full integration concept. With its re-vamped design, our exclusive stem made of Stealth Carbon delivers greater rigidity and steering precision superior to those of traditional design.

This new stem design has an angle of -17° and is available in two sizes measuring 85 or 100mm to deliver an optimal pedalling position for maximum performance.

Associée à nos vélos de compétition de XC Podium Carbon, notre technologie IST offre un concept d'intégration totale. Avec un design renouvelé, la potence exclusive fabriquée en Stealth Carbon dispose d'une plus grande rigidité et d'une précision de conduite supérieure, par rapport au design traditionnel.

Ce nouveau design de potence dispose d'un angle de -17° et se trouve disponible dans deux dimensions de 85 ou 100mm, pour une position de pédalage optimale afin d'obtenir le rendement maximum.

In Kombination mit unseren Wettkampfbikes XC Podium Carbon bietet unsere Technologie IST ein komplett integriertes Konzept. Mit einem neu entwickelten Design punktet dieser exklusive, in Stealth Carbon gefertigte Vorbau mit mehr Steifigkeit und Lenkpräzision als herkömmliche Designs.

Dieser neue Vorbau hat einen Winkel von -17° , und wird in zwei Längen (85 und 100mm) angeboten. So lässt sich die optimale Sitz-Position für maximale Leistungsfähigkeit erreichen.

MONDRAKER TEAM

Emmeline Ragot, DH world champion 2009 and 2011, **Danny Hart**, DH world champion 2011, **Markus Pekoll**, IXS Cup champion 2011 and European downhill champion 2013, and **Innes Graham** are the riders who will be competing in Mondraker colours in the World Cup, European IXS Cup races and in national championships where Emmeline has recently won the national championship in France and Danny Hart triumphed in the British national championship.

Thanks for another season to **Markus Stoeckl**, **Lukas Haider** and each and every one of the members of staff and riders in the MS Mondraker Team for taking Mondraker and the Summum Carbon Pro Team to the top and making this model into the most sought after in the World Cup!

Emmeline Ragot championne du monde de DH 2009 et 2011, **Danny Hart** champion du monde de DH 2011, **Markus Pekoll** – vainqueur de l'IXS Cup 2011 et champion d'Europe de descente 2013- et **Innes Graham** sont les coureurs qui défendent les couleurs de Mondraker lors de la Coupe du Monde, les courses IXS Cup européennes, ainsi que les championnats nationaux où Emmeline a gagné récemment le championnat de France et Danny Hart le championnat britannique.

Merci pour une saison de plus à **Markus Stoeckl**, **Lukas Haider**, à tous les membres du staff et à tous les coureurs MS Mondraker Team pour porter Mondraker et le Summum Carbon Pro Team au plus haut et faire de ce modèle le plus recherché de la Coupe du Monde!

Emmeline Ragot DH Weltmeisterin 2009 und 2011, **Danny Hart** DH Weltmeister 2011, **Markus Pekoll** – Sieger des IXS Cup 2011 und der Euromeister im DH 2013 **Innes Graham** – das sind die Fahrer, die die Mondraker Farben im Weltcup, dem europäischen IXC Cup sowie bei nationalen Meisterschaften repräsentieren. Emmeline kann auch hier als Gewinnerin der französischen Meisterschaften 2015 punkten, Seite an Seite mit Danny Hart, der ebenfalls die britische Meisterschaft gewinnen konnte.

Unser Dank geht an **Markus Stöckl**, **Lukas Haider** und alle Staffmitglieder und Fahrer des MS Mondraker-Teams, die die Mondraker Marke und das Summum Pro Team nachdem DH Weltcup ein weiteres Jahr zum Erfolg gebracht haben!

01

DOWNHILL

Since its launch Summum Carbon has set the standard as the world's lightest mass production downhill racing bike. It is a model with which the MS-Mondraker team has won World Cup races and national championships in 2015 such as those gained by Emmeline Ragot in France and Danny Hart in the UK, making it into the most sought after downhill racing bike and the absolute leader in international DH.

Depuis son lancement le Summum Carbon est devenu la nouvelle référence en étant le vélo produit en série le plus léger du monde en descente de compétition. Un modèle avec lequel l'équipe MS-Mondraker a gagné plusieurs courses de Coupe du Monde et les championnats nationaux en 2015, comme ceux obtenus par Emmeline Ragot en France et Danny Hart au RU. Le Summum Carbon est le vélo de course de descente le plus recherché et la référence absolue dans le panorama du DH international.

Seit seiner Markteinführung hat sich das Summum Carbon zum neuen Referenzmodell in seiner Klasse entwickelt. Ist es doch das leichteste DH Wettkampfbike, das in Serie produziert wird. Das Model, mit dem das MS-Mondraker Team bereits Weltcup-Rennen und nationale Meisterschaften mit Emmeline Ragot in Frankreich und Danny Hart in England gewinnen konnte. Es ist das beliebteste Downhill-Wettkampfbike und absolute Referenz im internationalen Downhill-Sport.

ENDURO

The spectacular Dune Carbon has broken the mould and burst onto the scene after being described by the international press as the new benchmark in Enduro racing since the day of its debut. It combines the best of Summum Carbon and Foxy Carbon, has adjustable geometry and comprises a range of 3 full carbon models that are an authentic dream. The Dune versions with an aluminium frame have improved their equipment and enhanced their appearance with 3 models now available in 2016.

Le spectaculaire Dune Carbon rompt avec toutes les normes et fait irruption sur la scène en étant catalogué par la presse internationale depuis son arrivée comme la nouvelle référence de l'Enduro de compétition. Il réunit le meilleur du Summum Carbon et du Foxy Carbon, il dispose d'une géométrie réglable et comprend une gamme de 3 modèles full carbon, véritablement de rêve. Les versions Dune avec cadre en aluminium améliorent leur équipement et renouvellent leur esthétique, ils sont au nombre de 3 modèles en 2016.

Das spektakuläre Dune Carbon bricht mit allen bisher da gewesenen Standards. Schon bei der ersten Präsentation feierte es seinen großen Auftritt mit Auszeichnungen der internationalen Presse, die es als das Referenz-Bike in der Enduro-Wettkampfkategorie eingestuft hat. Es vereint das Beste vom Summum Carbon und dem Foxy Carbon und punktet mit verstellbarer Geometrie und einer sensationellen Modell-Linie bestehend aus 3 Voll-Karbon-Bikes. Die Dune Versionen aus Alu kommen mit optimierten Komponenten und neuer Optik. 2016 wird es 3 Modelle geben.

ALL MOUNTAIN / TRAIL

Foxy Carbon, "THE BIKE", has become the queen of its speciality on its own merits and in 2016 the range premieres a new and more striking look in line with the rest of the collection. Foxy remains the great bestseller while the Crafty has been reinvented with two completely new models featuring 27'5"+ wheels and 100% Mondraker DNA and technology. The 120mm Factor range premieres its XR model with a 140mm Fox fork and superior equipment that boosts its performance.

Le Foxy Carbon, "THE BIKE" est devenu le roi de la spécialité en ayant fait ses preuves. En 2016 la gamme inaugure une esthétique renouvelée et plus vive, en accord avec le reste de la collection. Les Foxy sont toujours les "best-sellers", tandis que les Crafty se réinventent en étant deux modèles complètement nouveaux en roues 27'5"+ avec l'ADN et les technologies 100% Mondraker. La gamme Factor en 120mm lance le modèle XR avec une fourche Fox de 140mm et un équipement supérieur qui augmente ses prestations.

Foxy Carbon, "THE BIKE" hat sich durch seine Charakteristiken zum absoluten Top-Bike entwickelt. 2016 kommt das Foxy Carbon in neuer, gefälliger Optik, die seinem Charakter sehr gerecht wird. Foxy Bikes sind unsere beliebtesten Modelle. Die komplett neuen Crafty Bikes kommen mit 27'5"+ Laufrädern mit ADC und 100% Mondraker Technologie. In der Factor Reihe mit 120mm Federweg hat erstmals ein XR Modell mit einer 140mm Fox Gabel Premiere, außerdem wurde die Ausstattung verbessert, die somit den hohen Erwartungen gerecht wird.

XC PRO

The three Podium Carbon models continue to set the standard in XC racing while the Chrono Carbon range offers the best performance-weight-price ratio with identical colours and appearance in 2016 in 29er and 27'5". Finalist brings a touch of colour with high-end Xtralite Full butted aluminium frames in 27'5" and 29er and equipment upgrades across the range.

Les trois modèles Podium Carbon sont toujours la référence du XC de compétition tandis que la gamme Chrono Carbon offre le meilleur rapport rendement-poids-prix et ont des coloris et une esthétique identiques en 2016 autant en 29er qu'en 27'5". Les Finalist mettent une touche de couleur avec des cadres haut de gamme en aluminium Xtralite Full butted en 27'5" et 29er, et des améliorations d'équipement sur toute la gamme.

Die drei Podium Carbon Modelle sind absolute Meilensteine im XC Wettkampf. Die Modellreihe Chrono Carbon bietet das beste Preis-Leistungsverhältnis der Karbon-Hardtails, wobei zwei Laufradgrößen (29er und 27'5") in gleichem Design angeboten werden. Das Finalist setzt farbliche Akzente mit unserem hochwertigen Alu Xtralite Full butted Rahmen. Erhältlich als 27'5" oder 29er Version kommt es verbesserter Ausstattung in der gesamten Modellreihe.

XC SPORT

The new Phase has evolved up to a collection of 3 models in 2016, featuring a new look and the same specifications for the 29er and 27'5" versions with a more stylish and lighter frame. Brighter colours and a design that follows the trends of the top of the range models.

Les nouveaux Phase évoluent en passant à une collection de 3 modèles en 2016, avec de nouvelles cosmétiques et les mêmes spécifications pour les versions 29er et 27'5", et un cadre plus stylisé et plus léger. Les couleurs sont plus vives et le design suit les tendances des modèles plus haut de gamme.

Die neue Phase Serie kommt 2016 in 3 Modellvarianten, im neuen Designs und jeweils mit 29er und 27'5" Laufradversionen. Der schlankere und leichtere Rahmen, trägt kräftige Farben und folgt im Design der Tendenz unserer Top-Modelle.

KIDS

In 2016 kids will be in luck. This season at Mondraker we are introducing the first full suspension Factor 24, a dream bike with 100% Mondraker technology and the performance of a high-end bike which you can also fit with 26" wheels. The 16", 20" and 24" Finalists together with the two Panzer 20 and Panzer 24 "mini Panzers" round off our most complete range for kids to date.

En 2016, les enfants sont à l'honneur. Cette saison chez Mondraker nous présentons le premier Factor 24 tout-suspendu : un vélo de rêve avec les technologies 100% Mondraker et un comportement de vélo haut de gamme auquel vous pourrez également mettre des roues de 26". Les Finalist 16", 20" et 24", conjointement aux deux "mini Panzer" Panzer 20" et Panzer 24", complètent notre gamme enfant, la plus complète jusqu'à ce jour.

Im Jahr 2016 können die Kinder sich feiern lassen. Denn Mondraker präsentiert das erste Factor 24 Bike mit Vollfederung: Ein Traumbike für mit 100% Mondraker Technologie und dem Fahrverhalten, das auch die hochwertigen Bikes bieten. Das Factor 24 lässt sich sogar auf 26" Laufräder umrüsten. Die Modellreihe Finalist mit 16", 20" und 24" Bikes bildet gemeinsam mit den 2 „Mini-Panzern in 20" und 24" die umfangreichste und kompletteste Kinderlinie die wir je gebaut haben.

FAT BIKE

Completely renovated sleeker and lighter frames made in Stealth 2.0, front and rear thru-axles and three sophisticated models that will delight Fat Bike fans. The Panzers will be all the rage wherever they go and stand out from the other models in the market due to their exclusive Forward Geometry and unique fun performance.

Des cadres totalement rénovés, fabriqués en Stealth 2.0, plus stylisés et plus légers, des axes passants devant et derrière et trois modèles sophistiqués qui feront les délices des amateurs de Fat Bikes. Les Panzer font fureur partout où ils passent et se différencient des autres modèles du marché par leur géométrie Forward Geometry exclusive et un comportement unique et très amusant.

Komplett neu gestaltete Rahmen aus dünnerem und leichterem Stealth 2.0 Aluminium, mit Steckachse vorn und hinten, insgesamt top entwickelte Modelle, die jeden Fatbike-Fan begeistern werden. Mit den Panzer Modellen fällt man einfach auf, denn sie unterscheiden sich von den anderen Modellen am Markt durch die exklusive Forward Geometry, das einzigartige Fahrverhalten und den Fahrspaß.

BMX

Two racing models, Duel Pro and Duel Pro Team, are Mondraker's racing BMX featuring a Stealth aluminium frame with the best weight-rigidity-performance ratio. Radical new decorations, new forks and new Alienation wheels in the Pro Team model; a bike that has won national championships and is the current European champion and World Champion.

Deux modèles racing, le Duel Pro et le Duel Pro Team sont les BMX de course de Mondraker avec un cadre fabriqué en aluminium Stealth et le meilleur rapport poids-rigidité-rendement. Des nouvelles décors plus radicales, des nouvelles fourches et des nouvelles roues sur le modèle Pro Team, justement le vélo qui a été le vainqueur de championnats nationaux, et actuellement champion d'Europe et Champion du Monde.

Die beiden Mondraker Race-Modelle Duel Pro und Duel Pro Team, mit EVO Stealth Alu-Rahmen, bietet den besten Kompromiss aus Gewicht, Steifigkeit und Leistungsfähigkeit in einem BMX Rahmen. Mit neuen Dekors, neuer Gabel und neuen Alienation Laufrädern beim Modell Pro Team. Mit dem Duel Bike wurden schon zahlreiche Meisterschaften gewonnen.

e-MTB

As an innovative brand and responding to new market trends, at Mondraker we have developed an unprecedented collection of electric bikes resulting from our partnership with leading German manufacturer Bosch. It features a range of 5 models, 4 of which combine the best of the innovative 27'5" concept with the demands of a real e-MTB. The range will be represented by the three most contemporary categories on the market with the e-Vantage+, e-Crafty+ and e-Panzer models.

En tant que marque innovante qui répond aux nouvelles tendances du marché, Mondraker a développé une collection inédite de vélos électriques. Nés du partenariat avec le prestigieux fabricant allemand Bosch et disposant d'une gamme de 5 modèles parmi lesquels quatre réunissent le meilleur de l'innovant concept 27'5" et les exigences d'un véritable e-VTT. La gamme sera représentée par les trois plus grandes catégories actuelles du marché, les modèles e-Vantage+, e-Crafty+ et e-Panzer.

Als innovative Marke reagieren wir auf die neuesten Trends im Markt und haben eine außergewöhnliche Kollektion von E-Bikes entwickelt, die in Partnerschaft mit dem renommierten deutschen Hersteller Bosch entstanden ist. Sie umfasst eine Serie von 5 Modellen, von denen 4 das neue Laufrad-Konzept 27'5" bieten und alle Anforderungen erfüllen, die ein authentisches e-MTB erfüllen soll. Die Linie wird durch die 3 aktuellsten Kategorien auf dem Markt repräsentiert: e-Vantage+, e-Crafty+ und e-Panzer.

BOSCH PERFORMANCE LINE CX

Our e-MTB bike models feature Mondraker DNA and exclusive technology such as the manufacture of frames in Stealth alloy Structure aluminium, Forward Geometry and the Zero suspension system in the case of the e-Crafty+. They all use the Bosch Performance CX motor with a 500Wh or 400Wh PowerPack battery at customer's option and Intuvia Performance onboard display.

Nos modèles de vélos e-VTT disposent de l'ADN et des technologies exclusives Mondraker, comme la fabrication des cadres en aluminium Stealth alloy Structure, la géométrie Forward Geometry et le système de suspension Zero, dans le cas des e-Crafty+. Ils emploient tous le moteur Bosch Performance CX avec une batterie Powerpack de 400Wh ou 500Wh en option, et le display on-board Intuvia Performance.

In unseren e-MTB Modellen steckt die DNA und exklusive Technologie von Mondraker. Stealth Alu Rahmenkonstruktion, Forward Geometry und die Zero Suspension Technologie beim e-Crafty+ sind mit dem Bosch Performance CX Motor kombiniert. Mit Powerpack 400Wh / 500Wh Batterie und Intuvia Performance on-board Display.

• Maximum Momentum

Durable and strong allowing high speeds with continuous maximum torque (75Nm).

• Direct Flow

Small revolution, big impact! Foot on the pedal and directly into the flow. Power out of the turn even at 20rpm.

• Trail Control

Always the right support level (50-300%) in steep terrain on the go through the dynamic power control that is typical for Bosch.

• Gear Change Control

Direct gear changes for sporty acceleration. 14T chainring for the utmost mountain-climbing combination.

• eMTB-designed

High-quality ISIS interface and minimum Q-factor; Trail Control and Gear Change Control are gentle on the chain and cassette.

• Maximum Momentum

Une grosse puissance toujours disponible, offrant un couple maximal continu jusqu'à des vitesses élevées.

• Direct Flow

Petit tour de pédale...grand effet ! Le pied à peine posé sur la pédale et c'est parti, plein gaz dès la sortie de la courbe.

• Trail Control

Toujours un niveau d'assistance adapté aux terrains les plus raides – grâce au contrôle de puissance proportionnel et dynamique qui a fait la réputation de Bosch.

• Gear Change Control

Changements de vitesse directs et précis permettant les accélérations les plus sportives. La combinaison du plateau de 14 dents offre une performance maximale lors des ascensions les plus difficiles!

• eMTB-designed

Interface de pédalier au standard ISIS et Q factor réduit. Les technologies « Trail Control et Gear Change Control » préservent la chaîne et la cassette.

• Maximum Momentum

Dauerhaft und stark bis in hohe Drehzahlen mit einem kontinuierlich maximalen Drehmoment (75Nm).

• Direct Flow

Kleine Umdrehung, große Wirkung! Fuß aufs Pedal und direkt im Flow. Schon bei 20 U/min mit Power aus der Kurve.

• Trail Control

Immer mit der richtigen Unterstützungsstufe (50–300%) dosiert im steilen Gelände unterwegs – durch die Bosch-typische dynamische Leistungsregelung.

• Gear Change Control

Direkte Gangwechsel für sportliche Beschleunigung. 14T-Kettenblatt für Top-Bergsteigfähigkeit.

• eMTB-designed

Hochwertige ISIS-Schnittstelle und minimaler Q-Faktor; Trail Control und Gear Change Control schonen Kette und Kassette.
